2/2011	Draft/Version .1	Draft	Danielle Becker	Tegan Dinardo	1/31/2011
4/2011	Final Version 1.0	Final – No comments on Draft from GSA.		Jennifer Ritchey	4/15/2011
11/2014	Draft- Version 2	Draft-7.1.2 enhancements	Karin Keswani and Matthew Randall	Karin Keswani and Matthew Randall	11/2014
1/2015	Final	Updated first sentence in section 11 to read, "In order to accommodate Treasury's Do Not Pay initiative, GSA has the capability to create a vendor and/or payment file out of Pegasys that can be uploaded and processed in Do Not Pay.	Karin Keswani	Karin Keswani and Dan McNeil	1/2015

1 Introduction

Since October 10, 2001, the Pegasys Automated Disbursements (AD) subsystem has been disbursing a portion of GSA's payments. This user guide provides step-by-step instructions for users on how to enter and interpret disbursing related information on documents, view queries, enter schedule information from Treasury, cancel payments, create manual payments, and run reports.

Future disbursement information will be distributed through e-mail bulletins, news flashes, and the Pegasys web site.

2 Payment Document Information

Pegasys payment documents contain many pieces of disbursing related information that instruct the system how and when to disburse payments.

2.1 What Disbursement Information is entered on the Payment Form?

The Disbursing Information page [Figure 2-1: Payment Authorization Form–Disbursing Information Page] on invoice and payment documents provides valuable disbursement information. The information on this page will default onto invoices and copy forward to payments, usually requiring no changes.

Figure 2-1: Payment Authorization Form–Disbursing Information Page

- **General** (section)
 - **Disbursing Method**—Indicates whether the payment is a No Check payment (i.e., a payment which has been or will be disbursed by another system or entity), an Inter-Agency Transfer (i.e., a payment which will occur through a direct transfer of funds between government agencies), or a Check/EFT payment that will be disbursed through Pegasys.
 - **Disbursing Office**—The code that identifies the office that will disburse the given payment.
- **Inter-Agency Transfer Information** (section)—When a Disbursing Method of Inter-Agency Transfer is selected, this section is displayed onscreen.
 - **Type**—Can be either 1080, 1081, or IPAC.

- **Inter-Agency Sub-Level Prefix** —The unique code that is a component piece of the Inter-Agency Treasury Symbol, representing a programmatic breakdown of the account for Treasury publication purposes. The code is up to 2 characters long, in numeric format. It is displayed at the beginning of the Treasury Symbol inside parenthesis.
 - **Inter-Agency Symbol**—The billing agency's Treasury symbol into which the funds will be transferred.
 - **Customer BETC**—The eight character code used in the system to indicate the type of activity being reported, such as payments, collections, borrowings, etc. This code must accompany the Treasury Symbol and the dollar amounts in order to classify the transaction against the fund balance with Treasury.
 - **Disbursement Number**—The Treasury-assigned number that identifies the direct funds transfer (e.g., the SF-1081 number).
 - **Payee's ALC**—The Payee's Agency Location Code.
 - **Payee's Disbursing Office**—The Payee's Disbursing Office
 - **IPAC Schedule Date** - The date the IPAC activity is scheduled to process. If left blank, the system defaults to the document date.
- **No Check Information** (section)
 - **Disbursed By**— The entity or system responsible for disbursing the no check payment.
 - **Date**— The date of the disbursement.
 - **Check/Disbursement Number**— The check or disbursement number of the transaction.
 - **Check/EFT Information** (section)
 - **Group Payments Flag**—Indicates whether the payment is eligible for grouping with other payments to the same vendor.
 - **Disbursing Model**—Indicates whether the agency disbursing office will disburse this payment by printing its own check, or whether Pegasys will submit the payment to Treasury for disbursement. In Pegasys, the Disbursing Model will always be Treasury Disbursing.
 - **Treasury/FRB Disbursing Information** (section)
 - **Payment Category**—The type of vendor being paid. Determines whether or not the payment is subject to Treasury Offsets and as a result, defaults to Vendor. Other valid value is Miscellaneous.
 - **Line Code**— Used to crosswalk user defined payment category to type of vendor being paid. Valid values are Vendor and Miscellaneous.
 - **Check Type - Indicates the type of check selected. Schedule** (group box)
 - **Payment Type**—The type of disbursement method to be used (i.e. Check or EFT).
 - **Fiscal Year**—Identifies the fiscal year to which the item is assigned.
 - **Category**—The category of the schedule, derived by the payment type on which this payment will be submitted to Treasury (e.g., ACH, Treasury Disbursed Check, etc.).
 - **Type**—The type of schedule on which this payment will be submitted to Treasury (e.g., Corporate or Personal).
 - **Number**—Identifies the schedule number to which the payment type is assigned.
 - **Sequence Number**—Identifies the schedule sequence number to which the payment type is assigned.
 - **Manual Checkbox**—Indicates that the payment will be submitted to Treasury on a manual schedule *Section 6.1: How Do I Record Manual Schedule Information On An Invoice?*.

- **Agency Printing Information** (section)
 - **Payment Category** - The payment category. Determines whether or not the payment is subject to Treasury Offsets.
 - **Line Code** - Used to crosswalk category to type. Valid values are Vendor and Miscellaneous.
 - **Check Type** - Indicates the type of check selected (for example, mailed, hand pick-up, comment card, etc.).
 - **Agency Printing Information** - Indicates whether the agency disbursements office will print a check for this payment using the automated disbursements process or will use the manual check transaction to record a hand written check or print a check on demand.
- **State Disbursing Information** (section)
 - **Payment Type** - The type of disbursement method to be used.
 - **Mail Code** - The mail code of the disbursement information. Valid options include Mail Direct, Pouch to Post, Return to USDO, Special Handling and Save for Vendor Pick-up.
 - **USDO Bank** - Indicates whether a bank is a USDO bank, and may be used by the Department of State to make payments from a U.S. Government bank account at the bank. Default is 'False'.
- **Comments to Print** (section)
 - Lines 1-13—Any comments to be printed on the payment.

2.2 What does the Payments Section Display?

The Payments section is accessible by scrolling down the Header Accounting Line page of the payment form. This section shows valuable information, noted in Figure 2-2: : Payments Section and the descriptions below.

Figure 2-2: Payments Section

The figure shows a screenshot of a software interface for the 'Payments' section. It features a header labeled 'Payment' with a minus sign to its left. Below the header are five input fields, each with a label and a corresponding text input box. To the right of each input box is a small blue pencil icon. The labels and their corresponding input values are: 'Interest Reason:' followed by an empty box; 'Discount Lost Reason:' followed by an empty box; 'Quantity:' followed by '0.0000'; 'Acceptance Date:' followed by an empty box; and 'Delivery Date:' followed by an empty box.

- **Interest Reason**—A numeric code identifying the reason why the payment will incur an interest penalty. This becomes a required field if Pegasys determines that the payment is late, but will default in a code of "02— Finance Center Delay - Other."
- **Discount Lost Reason**—A numeric code identifying why an available discount was lost. This becomes a required field if Pegasys determines that the discount will be lost, but will default in a code of "01— Not Economically Justifiable."
- **Acceptance Date**—The date the purchased goods or services were accepted. This is copied forward from the referenced receipt or invoice to the payment.
- **Delivery Date**—The date the purchased goods or services were delivered. This is copied forward from the referenced receipt or invoice to the payment.

Note: After a payment is processed and the **Prompt Pay Schedule Date** has been

*calculated by Pegasys, the date is displayed in the **Disbursing Information** section located below the **Payments** section noted previously.*

2.3 How do I add Tax Lines to a Payment?

Tax lines can be added to Payment Authorizations (IP), Third Party Payments (TP), and Orders (IO). To enter tax information, users can navigate to the header accounting line tab. Once selecting a header accounting line, the user can choose the Tax Lines hyperlink. On the Tax Lines tab, users can use the new withholding type field, as shown in Figure 2-3: Tax Lines on all tax lines which are associated with a taxing authority and a reporting category to ensure proper payment and reporting.

Figure 2-3: Tax Lines

The screenshot displays a software interface for managing tax lines. At the top, there's a toolbar with buttons for Verify, Save, Submit, Schedule, Refresh, Fund Currency, Add Shortcut, Attachments, and Route. Below the toolbar, a navigation menu includes Header, Fixed Assets, Header Accounting Lines, Itemized Lines, Approval Routing, Memos, Summary, and Disbursing Information. Under Header Accounting Lines, the Tax Lines link is highlighted. The main content area is titled 'Tax Line'. It features three expandable sections: 'General' (with fields for Line Type, Line Number, Tax Disbursement Status, Transaction Type, and Related Cost Type), 'Document Reference' (with fields for Type, Number, Accounting, Item, Accounting Subline, and Final status), and 'Withholding Values Information' (with fields for Withholding Type, Tax Authority, Code, and Tax Authority Vendor Name).

2.4 How does Pegasys Calculate the Schedule Date?

At the time a payment document is processed, Pegasys determines the payment's Schedule Date. The Schedule Date is the date on which the payment must be selected for disbursement in order to be paid on time. Pegasys calculates this date based on several factors noted in Figure 2-4: Payment Scheduling Calculation.

Figure 2-4: Payment Scheduling Calculation

- **Schedule Date**—The date Pegasys will begin the disbursements process in order to send the payment to Treasury in time.
- **Base Date**—Determined by the entered or inferred Prompt Pay Type and based on trigger date; either the date that the invoice is received or logged, the acceptance/ delivery date, or later of the two.
- **# of Payment Days**—Specified by GSA; depends on the prompt pay type or the negotiated payment days entered on order.
- **# of Days Late in Returning Invoice**—Difference between the date the invoice should have been returned to the vendor and the date the invoice was actually returned.
- **Disbursing Lag**—The number of days it takes Treasury to disburse a payment (2 days).

2.4.1 What Other Factors affect the Schedule Date?

When scheduling a payment to be disbursed, Pegasys will also check to see if there were any discount terms recorded on the order. These terms will copy forward to the payment and be displayed in the **Discount Terms** section on the **Header Accounting Line** page. Pegasys will perform calculations to determine if it is economically justified to take the discount. If so, this will be factored into the **Schedule Date** calculation.

Figure 2-5 : Discount Terms Section displays the fields where discount information is stored on the payment.

Note: *If a payment is not subject to Prompt Pay laws, Pegasys first checks to see if there are negotiated days on the order. Pegasys will also check to see if negotiated days have been set up for the vendor. If neither is entered, the payment will be scheduled for the payment document date.*

Figure 2-5: Discount Terms Section

Discount Terms		
Days	Percentage (%)	Amount
0	0.000	\$0.00
0	0.000	\$0.00
0	0.000	\$0.00
0	0.000	\$0.00

2.5 Is it possible to Change the Schedule Date?

Under certain circumstances, it may become necessary to change the **Schedule Date**. It is possible to change the designated prompt pay code or to enter a schedule date manually. There are two ways to accomplish this depending on the desired outcome.

2.5.1 When is it appropriate to Change the Prompt Pay Code?

If your intention is to alter the terms of the contract, it is possible to select a different Prompt Pay type. This will change the number of days in which the vendor must be paid. If not paid by that date, the payment will incur interest.

To change this code, locate the invoice or payment document you wish to alter. Navigate to the **Header Accounting Line** page and locate the Prompt Pay Type field. Click the **Prompt Pay Type** hyperlink to search for and select an appropriate Prompt Pay code. Successfully [Verify] the form. Click [Submit] to process the document.

2.5.2 When is it appropriate to Manually Change the Schedule Date?

It is possible to change the Schedule Date by manually entering one on the invoice, payment, or Undisbursed Payment Query. This will instruct Pegasys to start disbursing the payment on the given day, but not to incur interest until the date designated by the Prompt Pay type. If a date is entered, warnings are issued to ensure that payments are not disbursed too early or discounts are lost.

If a schedule date is entered on the invoice (and then copied forward to the payment via Automated Match) or if the interface enters a schedule date on the payment it creates in Pegasys, this date will override any other calculated date or defaults.

2.5.2.1 How do I enter the Schedule Date on an Invoice or Payment?

1. Create or correct the invoice or payment document for which you wish to enter the schedule date.
2. Complete the document as usual.
3. Navigate to the **Header Accounting Line** page.
4. Scroll down to the **Disbursement Information** section.
5. Enter the necessary Schedule Date in the **Schedule Date** field. If the date entered is eight or more days early, select **Yes** from the **Early Payment Approval** drop down menu.

The screenshot shows a form titled "Disbursing Information". It contains the following fields:

- Schedule Date:** An input field.
- System-Calculated Schedule Date:** An input field.
- Early Payment Approval:** A dropdown menu with an option selected.
- Exclude from External Offsets:** A checkbox.
- Exclude from Internal Offsets:** A checkbox.

A "Return to Top" link is located at the bottom of the form.

6. Click the **[Verify]** button. Correct any errors reported on the form.

- Once the form is successfully verified, click the [Submit] button to submit the form to Workflow for approvals or processing.

System message indicates the form was submitted for processing successfully.

2.5.2.2 How do I Change the Schedule Date on the Undisbursed Payment Query?

- Select **Queries—Automated Disbursements— Undisbursed Payment Query** from the Pegasys menu bar. The **Undisbursed Payment Query** is displayed.

Approved	Last Modified By	Schedule Date	System-Calculated Schedule Date	Held	Disbursing Office	Disbursing Model	Schedule Category	Schedule Type	Payee Code	Address Code	Payee Name	Doc Type	Doc Number	Total Amount	Security Org
- NO ITEMS TO DISPLAY -															

- Enter the payment document number in the **Document Number** field and click the **[Search]** button.

Note: If the full value is unknown, enter a partial value and the * wildcard symbol before or after the value entered. The search results will be displayed at the bottom of the page.

- Select the payment to be rescheduled. Click the **[Reschedule]** button.
- Enter the new Schedule Date on the **Reschedule** page and click the **[OK]** button.
- The selected payment will now have the new Schedule Date.
- Click the **Inbox** hyperlink in the **Link Strip** to return to your inbox.

It may be necessary when entering a new Schedule Date to enter an **Interest Reason Code** or a **Discount Lost Reason Code**, depending on the new Schedule Date. In addition, if the new schedule date will be more than eight days before the prompt pay determined schedule date, then the Early Payment Approval flag must be checked. If any of these scenarios will occur, follow these steps:

The Undisbursed Payment Query Detail page is displayed.

1. Repeat steps 1-2 above.
2. Select the appropriate payment record and click the [Details] button.

Doc Type	Doc Num	Line Number

3. In the **Rescheduling Information** section, enter the **New Schedule Date** and if necessary, enter the **Interest Reason Code** or **Discount Lost Reason Code** by clicking the hyperlink and searching for and selecting the appropriate code.

Note: If the new schedule date will be more than eight days before the prompt pay determined schedule date, use the drop down menu in the Early Payment Approval field and select Yes to approve the early payment.

4. Click the **[Reschedule]** button. The new date will populate the **Schedule Date** field.
5. Click the **Inbox** hyperlink in the **Link Strip** to return to your inbox.

3 Disbursements Overview

Figure 3-1: Disbursement Process Calendar shows the process through which Pegasys disburses payments. Details about each of these steps are included in the table below.

Figure 3-1: Disbursement Process Calendar

Day 1	Day 2	Day 3	3-5 Business Days Later	Next Day
View the Undisbursed Payments Query	Payment Selection Summary Report is Available	Vendor Receives Payment	Schedule Query updated with Treasury's Confirmation/Rejection Information	View the EFT Payment Query
View the Undisbursed Payments Report	Payment Selection Detail Report is Available	Nightly Disbursements Cycle Runs	Nightly Disbursements Cycle Runs	View the Check Query
View the Payments Awaiting Replacement Query	View the Schedule Query			View the Prompt Pay Detail Query
Nightly Disbursements Cycle Runs	Finance transmits schedule via ECS			Discount Earned and Lost Summary Report
	Nightly Disbursements Cycle Runs			Nightly Disbursements Cycle Runs

Day	Step	Description
1	Undisbursed Payment Query	The Undisbursed Payment Query displays undisbursed and rescheduled payment accounting lines, with each accounting line within a payment displayed as its own line. For each payment accounting line, the query displays information such as the schedule date, disbursing office, vendor code, document type and number, payment amount, approval indicator, and a group payment indicator. As payments are disbursed, they are removed from this query.
	Undisbursed Payments Summary Report	The Undisbursed Payments Summary Report displays the total number of payment accounting lines and disbursement amounts for all disbursement offices per schedule date.
	Payments Awaiting Replacement Query	The Payments Awaiting Replacement query displays Check or EFT payments that have been canceled for replacement. The query displays the disbursing office, trace number, payment date, schedule category, vendor name and payment amount. As the payments are disbursed again, they are removed from the query.

	Nightly Disbursements Cycle Runs	Every evening, a series of batch jobs will run. These jobs will select and group payments and then create a Treasury Schedule.
2	Payment Selection Summary Report	The Payment Selection Summary Report displays what will be contained on the SF-1166 Report. This allows users to review a list of payment accounting lines selected for disbursements in a given cycle. The report lists the appropriations from which each payment is to be made as well as the total amount of payments per fund.
	Payment Selection Detail Report	The Payment Selection Detail Report lists payments to be paid by Treasury. Each page lists the payment document lines within a payment sequence (i.e., each Check or EFT payment) for each schedule. It also lists the entire accounting distribution for each payment document line.
	Schedule Query	The Schedule Query displays summary schedule information such as the date submitted, number of payments, and total vouchered amount. This query also provides a detailed list of all payment document lines included on the schedule, with the amount of each payment.
	SF1166 Report	For each schedule, the report lists the appropriations from which the payment is to be made by Treasury as well as the total amount of payments per fund.
3-5	Schedule Query is Updated	Treasury confirmation or rejection of the schedule is recorded here.
	Nightly Disbursements Cycle Runs	After Treasury confirmation/rejection information is entered on the Schedule Query, another nightly cycle of batch jobs will run. This will update all the records on the schedule, populate several reports and if confirmed, the nightly cycle will populate the Check and EFT Payment Queries.
Next Day	Check/EFT Payment Query	The Check/EFT Payment Query displays summary information for individual payments including the disbursing office, trace number, payment date, schedule category, payee code, schedule fiscal year, schedule type, and schedule number. A detailed list of all the payment lines and amounts is also available.
	Summary of Net Outlays Report	The Summary of Net Outlays by Treasury Symbol provides summary totals of disbursements made for each Treasury Symbol for a specific month. The report also lists totals for all Treasury Symbols. The report displays disbursement amounts as negative numbers because they are stored as a credit to cash in the general ledger. Positive numbers represent a receipt of cash.
	Payment History Report	The Payment History report displays each payment document as well as each corresponding accounting line for all payments within the range defined by the report parameters.
	Discount Earned and Lost Summary Report	This report lists the discounts earned and lost by GSA. The report is grouped into two sections. The first section shows the summary of the discounts earned and lost by fund. It displays the information for the current month and year-to-date. The second section shows the detail of each invoice that offered a discount and whether the discount was earned or lost.

4 Disbursement Steps

As *Figure 4-1: Disbursement Process Calendar* illustrates, the disbursement process occurs over a number of days. *Figure 4-1: Disbursement Steps* shows how the steps on the calendar add up to a successful disbursement.

This chapter provides instructions for reviewing the Undisbursed Payment Query, reviewing and updating the Schedule Query, and reviewing the EFT Payment Query, EFT Query, Check Query, and the Prompt Pay Query.

Figure 4-1: Disbursement Steps

4.1 Reviewing the Undisbursed Payment Query

The Undisbursed Payment Query displays undisbursed payments as well as rescheduled payments and any payments that have been rejected by Treasury. Undisbursed payment records are grouped and viewed based on their common attributes (Document Type, Document Number, Schedule Date, Disbursing Office, Vendor, etc.) so that users may optionally perform actions (Reschedule, Approve, Disapprove, Hold) on these undisbursed payment records as a “group”, rather than being required to apply actions to all individual lines of an undisbursed payment document that share the same attributes.

On the Undisbursed Payment Query Detail page, each accounting line in a payment is displayed as its own separate line. For each accounting line, this page displays information such as the schedule date, disbursing office, vendor code, document type and number, payment amount, approval indicator, and a group payment indicator. As payments are disbursed, they are removed from the query.

4.1.1 How do I View the Undisbursed Payment Query?

1. Select **Queries—Automated Disbursements— Undisbursed Payment Query** from the Pegasys menu bar. The **Undisbursed Payment Query** is displayed.

- NO ITEMS TO DISPLAY -

2. Enter the **Schedule Date**, **Disbursing Office**, and **Document Type** in the corresponding fields. Users may also search on **Vendor Code**, **Security Org**, **Approved** status (Yes or No), or any of the other available search criteria options.
Note: The **Schedule Date** is the date Pegasys will begin the disbursement process in order to get the payment to Treasury in time. The nightly disbursing process selects eligible payments with a schedule date two days ahead of the current date.
3. Click the **[Search]** button. The query results will be displayed at the bottom of the page To clear search criteria, click the **[Clear]** button.
4. Select the payment record to review and then click the **[Details]** button. The **Undisbursed Payment Query Detail** page is displayed.

Note: Most payments on this query will default to Approved status. However, some Region 7 payments that are over a certain dollar limit may need to be manually approved. To do this, simply select the payments and click the **Approve** button in the

Undisbursed Payment Query. This process is explained in greater detail in the next section.

4.1.2 What does the Undisbursed Payment Query Display?

The Undisbursed Payment Query displays undisbursed payments as well as rescheduled payments and any payments that have been rejected by Treasury. Undisbursed payment records are grouped and viewed based on their common attributes (Document Type, Document Number, Schedule Date, Disbursing Office, Vendor, etc.) so that users may optionally perform actions (Reschedule, Approve, Disapprove, Hold) on these undisbursed payment records as a “group”, rather than being required to apply actions to all individual lines of an undisbursed payment document that share the same attributes.

On the Undisbursed Payment Query Detail page, each accounting line in a payment document has its own line. For example: if a payment document has 5 accounting lines, then the user will see 5 lines on this page, one for each accounting line. Each one of those accounting lines has the same document number in the Document Number field, with a different number in the Line Number field. For each accounting line, this page displays information such as the schedule date, disbursing office, vendor code, document type and number, payment amount, approval indicator, and a group payment indicator.

Payments can be approved or disapproved directly from the Undisbursed Payment Query, without going into the Undisbursed Payment Query Detail page. Using the above example, the user can select the payment (and its five lines) and, if it is unapproved – approve it and if it is approved –disapprove it.

Note: If the selected payments are approved, only the [**Disapprove**] button should be selected. If the selected payments are unapproved, then the [**Approve**] button should be selected.

Another advantage is that multiple payment documents can be selected and approved or unapproved en masse. Example: the user has entered certain parameters in the Undisbursed Payment Query and clicks the [**Search**] button. The result is ten payment documents. To approve all ten payment documents, the user simply selects all ten payment records and clicks the [**Approve**] button. If the payment documents are approved already, the user can disapprove them by selecting all the lines and clicking the [**Disapprove**] button.

4.1.3 What should I look for on the Undisbursed Payment Query Detail?

- **Schedule Date**—Displays the date that Pegasys will need to select the payment line to go through the disbursements process. Keep in mind that Pegasys has been set up to select payments two days ahead of the indicated Schedule Date so that the payment will be disbursed two days early.
- **Approved** (drop-down box)—Indicates whether or not the disbursement has been approved and is ready to be picked up by the disbursements process on the indicated schedule date. Region 6 payments will be approved for disbursement by default so this drop-down box will display ‘Yes’, unless a user has clicked the [**Disapprove**] button on

the Undisbursed Payment Query page. Payments from Region 7 that are over a certain dollar amount may not default to approved.

- **Disbursement in Progress** (drop-down box)—If this drop-down box displays ‘Yes,’ that indicates that a payment line has been selected and is in the process of being disbursed. Once a payment line is in the process of being disbursed, no changes can be made. Because the disbursing process runs at night, a user will normally never see this drop-down box display ‘Yes.’

Rescheduling Information (section)

- **New Schedule Date**—The new date on which Finance can reschedule the payment line to be selected by the disbursements process. This field allows Finance to re-schedule a payment line so that Pegasys will disburse it at another date, if necessary.
- **Early Payment Approval** (drop-down box)—If a user enters a new schedule date that is more than eight days before the prompt pay determined schedule date, it is necessary to use the drop down menu to select **Yes**. This indicates the payment line is approved for early disbursement.
- **Interest Reason Code**—A code that identifies the reason why the payment line will incur an interest penalty. This is a required field if the payment line is being rescheduled for a later date and will incur interest. Click this link and search for and select an appropriate Interest Reason code.
- **Discount Lost Reason Code**—A code that identifies the reason why an available discount was lost. This is a required field if the payment line is being rescheduled for a later date and will lose its discount. Click this link and search for and select an appropriate Discount Lost Reason code.

4.1.4 How Can I Hold a Payment So That it Does Not Get Disbursed?

It is possible to hold a payment from being disbursed on the Undisbursed Payment Query.

1. Select **Queries—Automated Disbursements— Undisbursed Payment Query** from the Pegasys menu bar. *The Undisbursed Payment Query is displayed.*

- Enter the **Schedule Date**, **Disbursing Office** and **Document Type** in the corresponding fields. Users can also search by **Vendor** or **Approved Status** (Yes/No) or any of the other available search criteria.

Note: The **Schedule Date** is the date Pegasys will begin the disbursement process in order to get the payment to Treasury in time.

- Click the **[Search]** button. All of the payments that match the parameters entered above will be displayed at the bottom of the page.
- Select the appropriate payment document.
- Click the **[Hold]** button.
- If necessary, enter the **Held/Release Reason**. Then click the **[OK]** button. System messages indicate that the Undisbursed Payment Hold was successful.

Note: When the disbursement of this payment is to resume, repeat steps 1-3 and select the **Release** button. Then, proceed to step 6.

- Click the **Inbox** hyperlink in the **Link Strip** to return to your inbox

4.1.5 How Can I Hold all Payments to a Specific Vendor?

If it becomes necessary to prevent any payments to a specific vendor from being disbursed, this can be accomplished by altering the vendor's record in the Vendor Maintenance Table.

- Select **Transactions—Reference Data - Vendor—New—Vendor Document** from the Pegasys menu bar. The **New Vendor Document** page is displayed.

Pegasys > Transactions > Reference Data > Vendor > New > New Vendor Document

< Back Finish Cancel

New Vendor Document

* Document Type:

Security Org:

* Document Number:

Doc Title:

* Vendor Code:

Vendor Name:

Type of Action: Create New Correct Existing

Copy: None Document Vendor

2. Enter the appropriate **Document Type** and click the **[Generate]** button to automatically generate a document number.
3. Enter the vendor's code in the **Vendor Code** field and then select the **Correct Existing** radio button. Click the **[Finish]** button. *The Header page is displayed.*

4. Select the **Address Lines** tab. Click the **[Add/Change]** button.
5. Enter the **Address Code** that should be modified. If necessary, click the **Address Code** hyperlink to search for and select the appropriate address code.
6. Select the appropriate **Line Action** from the drop-down box.
7. Click the **[Next]** button.
8. Scroll down to the **Payment Information** section. **Check the Hold Payment** checkbox. A reason for holding the payment must be entered in **Reason for Hold** box or an error message will appear after verification.
9. Click the **[Verify]** button and correct any errors.

10. Once the form is successfully verified, click the **[Submit]** button to submit the form to Workflow for processing.

Note: When disbursements to this specific vendor address code are to resume, simply repeat these steps and uncheck the **Hold Payment** flag.

11. The Inbox is displayed. System messages indicate the form was submitted for processing successfully.

4.1.6 What if a Vendor Code is Deactivated and it may have been used on an Undisbursed Payment?

Once a payment is created and is sitting on the Undisbursed Payment Query, Pegasys will not perform an edit to make sure that the vendor is still valid. Therefore, any time a vendor code is deactivated, it is necessary to check the Undisbursed Payment Query for payments using that code. Then, users should un- approve the payment, cancel the payment document, and correct the invoice by entering a valid vendor.

1. Select **Queries—Automated Disbursements—Undisbursed Payment Query** from the Pegasys menu bar. The Undisbursed Payment Query is displayed.

2. Enter the vendor code and the vendor address code in the **Code** fields.

Note: If the full value is unknown, enter a partial value and the * wildcard symbol before or after the value entered. The search results will be displayed at the bottom of the page.

3. Click the **[Search]** button. The query results will be displayed at the bottom of the page.
4. Highlight each separate line or click the checkbox to the left of the header fields to select all lines at once.
5. Click the **[Disapprove]** button so that the payment(s) cannot be disbursed.

Note: Take note of the document numbers associated with the payments that have been unapproved. They will need to be canceled so that the invoice can be corrected. Follow Steps 8-11 below to cancel a payment document.

- Select **Transactions—Accounts Payable—Cancel** from the Pegasys menu bar. The **Cancel** page is displayed.

Document Type	Document Number	Amendment Number	Title	Document Date	Document Status	User ID
FM	PH20101012000004			11/08/2010	Processed	alroles111

- Enter the **Document Type** and the **Document Number**. Then click the **[Search]** button.

Note: If the full value is unknown, enter a partial value and the * wildcard symbol before or after the value entered. The search results will be displayed at the bottom of the page. The query results will populate the bottom portion of the page.

- Highlight the appropriate document record and click the **[Cancel]** button.
- The payment document is displayed. Review the document and confirm that the inactivated vendor code was used in the **Vendor** group box.
- Click the **[Submit]** button to cancel the payment document. System messages indicate the form was submitted for processing successfully.
- It is now possible to correct the invoice. Once the invoice is processed with the correct vendor information, Pegasys will create a new payment via the Automated Match process. The payment will be available for review on the Undisbursed Payment Query.

4.2 Reviewing the Schedule Query

Once all the payment documents have been selected by the nightly cycle, the Pegasys disbursements process creates a schedule file that is sent to Treasury for disbursement. At this stage, the schedule will be displayed on the Schedule Query with a Schedule Action of No Action, meaning it has not been updated with confirmation or rejection information from Treasury.

4.2.1 How do I View the Schedule Query?

- Select **Queries—Automated Disbursements—Schedule Query** from the Pegasys menu bar. The **Schedule Query** is displayed.

Transactions > Queries > Reference > System Administration > Utilities > Bookmarks >

Momentum > Queries > Automated Disbursements > Schedule Query

- Enter the **Fiscal Year** and **Disbursing Office**. Select a **Schedule Action** of **No Action** and enter the **Schedule Number** if it is known.

Note: The Schedule Action represents the status of the schedule:

- **Confirm**—Treasury has confirmed the schedule and the payment has been sent to the vendor.
- **No Action**—The information has been sent to Treasury but no confirmation has been received. If you were to look at the payment document, you would notice that the money is in transit
- **Rejected**—Treasury has rejected the schedule and has sent it back to GSA without disbursing.
- **In Progress**—Not all of the Detail Lines in the Schedule have been confirmed/rejected. A Schedule with In Progress as the Schedule Action will not be picked up by Treasury Reconciliation.
- **Complete**—All of the Payment Lines within the Schedule have either been confirmed or rejected. This Schedule will be picked up by Treasury Reconciliation, but some of the Payments within the Schedule may have been rejected and will not be picked until they are confirmed.

- Click the **[Search]** button. The query results will be displayed at the bottom of the page.
- Select the schedule record to review and click the **[Details]** button. The **Schedule Query Detail** page is displayed.

Record Amount:	\$20.00

6. Note the information displayed in the fields on the page. It is also possible to view the individual payment documents by clicking on the **View Document** button.
7. Click the **Inbox** hyperlink in the **Link Strip** to return to your inbox.

4.3 Updating the Schedule Query

Once all the payment documents have been selected by the nightly cycle, the Pegasys disbursements process creates a schedule file that is sent to Treasury for disbursement. Initially, the schedule will be displayed on the Schedule Query with a **Schedule Action** of No Action.

When Treasury sends confirmation or rejection information back to GSA via GOALS, it is necessary to record this information on the Schedule Query.

4.3.1 How Do I Record Treasury's Confirmation or Rejection of the Schedule?

1. Select **Queries—Automated Disbursements—Schedule Query** from the Pegasys menu bar. The **Schedule Query** is displayed.

	Sch FY	Schedule Category	Schedule Type	Disbursing Model
	2011	ACH (CCD+/PPD+)	Personal	Treasury Disbursing

- Enter the **Fiscal Year** and **Disbursing Office**. Select a **Schedule Action** of **No Action**, and enter the **Schedule Number** or **Submission Date** if it is known.

Note: The **Schedule Action** represents the status of the schedule:

- Confirm**—Treasury has confirmed the schedule and the payment has been sent to the vendor.
- No Action**—The information has been sent to Treasury but no confirmation has been received. If you were to look at the payment document, you would notice that the money is in transit.
- Rejected**—Treasury has rejected the schedule and has sent it back to GSA without disbursing
- In Progress**—Not all of the Detail Lines in the Schedule have been confirmed/rejected. A Schedule with In Progress as the Schedule Action will not be picked up by Treasury Reconciliation.
- Complete**—All of the Payment Lines within the Schedule have either been confirmed or rejected. This Schedule will be picked up by Treasury Reconciliation, but some of the Payments within the Schedule may have been rejected and will not be picked until they are confirmed.

The **Submission Date** is the date the schedule was created by the Pegasys disbursements batch process. Kansas City and Fort Worth disbursing offices will run these batch processes during the nightly cycle so the schedule will be transmitted to Treasury on the next business day. For TMR disbursements, the schedule will be submitted on the same day as it was created.

3. Click the **[Search]** button.

Note: The query results will populate the bottom of the page.

4. Select the schedule record you would like to view and then click the **[Details]** button. The **Schedule Query Detail** page is displayed.

The screenshot shows the 'Schedule Query Detail' page with the following sections:

- Schedule Information:** FY: 2011, Schedule Category: ACH (CCD+PPD+), Disbursing Office: E2, Payment Category: VENDOR, Line Code: Vendor, Partition: . Manual: Yes, Posted by Treasury/FRS: Posted, Vouchered Amount: \$40.00, Disbursing Model: Treasury Disbursing, Schedule Type: Personal, Vouchered Transaction Amount: \$40.00, Schedule Number: GS110001, Transaction Currency: USO, Total Number of Payments: 1, Number of Confirmed Payments: 1, Fully Expended: checked, Details Posted: checked.
- Output File:** Submission Date: 10/23/2010, View Output, Output File Name: .
- Confirmed Information:** Detail Level Confirmation/Rejection: checked, Confirmed/Rejected Amount: \$40.00, Pre-printed Number: , Check Symbol: , Schedule Action: Confirm, Confirmed/Rejected Transaction Amount: \$40.00, Beginning Check/Trace Number: 00000001, Ending Check/Trace Number: 00000001, Backout Requested: checked, Confirmed/Rejected Date: 10/23/2010, Accounting Period: .

5. At the bottom of the page, notice the Confirmed Information section.

The screenshot shows the 'Confirmed Information' section with the following fields:

- Detail Level Confirmation/Rejection: checked, Confirmed/Rejected Amount: \$0.00, Pre-printed Number: , Check Symbol: , Schedule Action: No Action, Confirmed/Rejected Transaction Amount: \$0.00, Beginning Check/Trace Number: , Ending Check/Trace Number: , Backout Requested: checked, *Confirmed/Rejected Date: , Accounting Period: .

6. To confirm a schedule, select a **New Schedule Action** of **Confirm** from the drop down menu. Then enter the **Confirmed/Rejected Amount**, **Confirmed/Rejected Transaction Amount**, the **Confirmed/Rejected Date**, and the **Beginning** and **Ending Check/Trace Numbers**. If confirming a Treasury Disbursed Check, also enter the **Check Symbol**.
7. To reject a schedule, select a **New Schedule Action** of **Reject** from the drop down menu. Then enter the **Confirmed/Rejected Amount**, **Confirm/Rejected Transaction Amount**, and the **Confirmed/Rejected Date**.
8. Click the **[Save]** button.

Note: The Confirmed Information section on the page will be updated with the new schedule information.

It is possible to confirm or reject only certain payments within a particular Schedule and not confirm the other payments:

1. In the **Schedule Query Details** page, click the **Detail Level Confirmation/Rejection** flag in the **Confirmed Information** section.
2. Click the **Details** tab.
3. Highlight the vendor record you would like to view and click the **Schedule Detail** link. The Schedule Detail page is displayed.

Action:	Confirm
Paid By Check:	<input type="checkbox"/>

4. In the **General** section, select an **Action** of **Confirm** from the drop down menu. Then enter the **System Confirmed Rejected Amount**, **Transaction Confirmed Transaction Amount**, and **Check/Trace Number**. If confirming a Treasury Disbursed Check, also enter the **Check Symbol**.
5. Click the **Schedule Query Detail** hyperlink to return to the **Schedule Query Detail** page. Select **Complete** from the **Schedule Action** drop down menu and enter the new **Confirmed/Rejected Date**.
6. Click the **[Save]** button.

Click the **Inbox** hyperlink in the **Link Strip** to return to your inbox.

4.3.2 What if I Confirmed a Schedule in Error?

If a schedule is accidentally confirmed or rejected with incorrect information (e.g., the wrong confirmation date or check/trace numbers), and the mistake is caught the same day, it is possible to change the information by recording a new schedule action on the

Schedule Query. In this case, simply follow the steps in **Section 4.3.1: How Do I Record Treasury's Confirmation or Rejection of the Schedule?**

If the mistake is caught after the nightly cycle has run, it will be necessary to “back out” the confirmation. Backing out a confirmation reverses the updates performed by the nightly cycle.

Note: It is not possible to back out the Rejection of a schedule once the nightly cycle has run. The payments on a rejected schedule are returned to the Undisbursed Payment Query.

4.3.2.1 How Do I Back Out a Schedule?

1. Select **Queries—Automated Disbursements—Schedule Query** from the Pegasys menu bar. The **Schedule Query** page is displayed.

Sch FY	Schedule Category	Schedule Type	Disbursing Model	Schedule Number	Manual Schedule	Disbursing Office	Schedule Action	Confirmed/Rejected Date	Pre-printed Number	Submission Date	Posted by Treasury/FRB
2011	ACH (CCD+/PPD+)	Personal	Treasury Disbursing	GS11D001	Yes						

2. Enter the Fiscal Year, the Schedule Number if known, the Disbursing Office, a Schedule Action of Confirm, and Posted in the Posted By Treasury field.
3. Click the [Search] button.

Note: The query results will populate the bottom of the page

4. Select the record you would like to view and click the [**Details**] button. The Schedule Query Detail page is displayed.

	Sch FY	Schedule Category	Schedule Type	Disbursing Model	Schedule Number	Manual Schedule
	2011	ACH (CCD+/PPD+)	Personal	Treasury Disbursing	GS11D001	Yes

2. Enter the **Fiscal Year** and **Disbursing Office**. Then select a **Schedule Action** of **Confirm** or **Reject** and enter the **Schedule Number** or **Submission Date** if it is known. Select **Posted** from the **Posted by Treasury** drop-down box.

Note: The Schedule Action represents the status of the schedule:

- **Confirm**—Treasury has confirmed the schedule and the payment has been sent to the vendor.
- **No Action**—The information has been sent to Treasury but no confirmation has been received.
- **Rejected**—Treasury has rejected the schedule and has sent it back to GSA without disbursing.
- **In Progress**—Not all of the Detail Lines in the Schedule have been confirmed/rejected. A Schedule with In Progress as the Schedule Action will not be picked up by Treasury Reconciliation.
- **Complete**—All of the Payment Lines within the Schedule have either been confirmed or rejected. This Schedule will be picked up by Treasury Reconciliation, but some of the Payments within the Schedule may have been rejected and will not be picked until they are confirmed.

The Submission Date is the date the schedule was created by the Pegasys disbursements batch process. Kansas City and Fort Worth disbursing offices will run these batch processes during the nightly cycle so the schedule will be transmitted to Treasury on the next business day. For TMR disbursements, the schedule will be submitted on the same day as it was created.

3. Click the **[Search]** button.

Note: The query results will populate the bottom portion of the page.

4. Select the schedule record you would like to view and then click the **[Details]** button. The **Schedule Query Detail** page is displayed.

The screenshot shows the 'Schedule Query Detail' page with three main sections:

- Schedule Information:** FY: 2011, Schedule Category: ACH (CCD+FFD+), Disbursing Office: E2, Payment Category: VENDOR, Line Code: Vendor, Partition: . Manual: Yes, Posted by Treasury/FRB: Posted, Disbursing Model: Treasury Disbursing, Schedule Type: Personal, Voucherized Transaction Amount: \$40.00, Schedule Number: GS11D001, Transaction Currency: USD, Total Number of Payments: 1, Number of Confirmed Payments: 1, Fully Expended: No, Details Posted: No.
- Output File:** Submission Date: 10/23/2010, View Output, Output File Name: .
- Confirmed Information:** Detail Level Confirmation/Rejection: No, Confirmed/Rejected Amount: \$40.00, Pre-printed Number: , Check Symbol: , Schedule Action: Confirm, Confirmed/Rejected Transaction Amount: \$40.00, Beginning Check/Trace Number: 00000001, Backout Requested: No, Confirmed/Rejected Date: 10/23/2010, Ending Check/Trace Number: 00000001, Accounting Period: .

5. Select the **Details** tab to review additional information regarding this schedule.
6. Click the **Inbox** hyperlink in the **Link Strip** to return to your inbox.

4.4.2 What Does the Schedule Query Detail Page Display?

The Schedule Information window displays summary schedule information for each schedule.

- **Schedule Action**
 - **Confirm**—Treasury has confirmed the schedule and the payment has been sent to the vendor.
 - **No Action**—The information has been sent to Treasury but no confirmation has been received.
 - **Rejected**—Treasury has rejected the schedule and has sent it back to GSA without disbursing.
 - **In Progress**—Not all of the Detail Lines in the Schedule have been confirmed/rejected. A Schedule with In Progress as the Schedule Action will not be picked up by Treasury Reconciliation.
 - **Complete**—All of the Payment Lines within the Schedule have either been confirmed or rejected. This Schedule will be picked up by Treasury Reconciliation, but some of the Payments within the Schedule may have been rejected and will not be picked until they are confirmed.
- **Posted By Treasury**—Indicates whether Treasury's confirmation or rejection of the schedule has been posted by the Treasury reconciliation process and the nightly cycle has updated the schedule with that information.
- **Submission Date**—The date the schedule was created by the Pegasys disbursements batch process.

- Kansas City and Fort Worth disbursing offices will run these batch processes during the nightly cycle so the schedule will be transmitted to Treasury on the next business day. For TMR disbursements, the schedule will be submitted on the same day as it was created.
- **Details Posted** (check box)—Indicates whether the supporting payment authorizations have been posted by the Treasury reconciliation process.
- **Confirmed/Rejected Amount**—The amount of the schedule, which has been confirmed or rejected by Treasury.
- **Check/Trace Numbers**—The Check/EFT trace numbers assigned to the payments on the schedule.

4.4.3 How can I Look at Each Payment Line?

1. Repeat Steps 1-4 in **Section 4.4.1: How Do I View the Schedule Query?**
2. Click the **Details** tab. The Details page is displayed.

The screenshot shows a software interface for viewing a schedule detail. At the top, there are two tabs: "Schedule Query Detail" and "Details", with "Details" being the active tab. Below the tabs, there is a breadcrumb navigation: "Schedule Detail | Sublines". Underneath the navigation, there are several buttons: "Display" with a dropdown menu set to "10 Items", "View as CSV", and "Sort...". A table follows, with a header row containing columns for "Sequence", "Vendor Code", "Address Code", and "Vendor Name". The data row shows a single record: Sequence 1, Vendor Code 1 299664807, Address Code 00001, and Vendor Name RICHARD C BRAIDICH. The "Sequence" column contains icons for edit and delete.

Sequence	Vendor Code	Address Code	Vendor Name
	1 299664807	00001	RICHARD C BRAIDICH

3. Highlight the vendor record to review and click the **Schedule Detail** link. The Schedule Detail page is displayed.

Document Number: PM2010102300001			
- Item Line #: 0
- Actg.Line #: 1

3. Users are able to view a list of all the payment document lines.

Highlight a record so that the information populates the fields at the bottom of the page.

4. Click the **[View Document]** button to view the payment document.
5. Click the **Inbox** hyperlink to return to your inbox.

4.6 Reviewing the EFT Query

The EFT Query measures the extent to which vendors are paid electronically. A high use of EFT saves money, reduces paperwork, and improves cash management. GSA users may search for these metrics by accounting period range. The query details display the percentage of electronic payments to total payments grouped by disbursing office for the accounting period.

4.6.1 How Do I View the EFT Query?

1. Select **Queries—Metrics—EFT Query** from the Pegasys menu bar. The EFT Query is displayed.

EFT Query

Search Criteria

From Accounting Period: To Accounting Period:

Display 10 Items

2. Enter the **To Accounting Period** and the **From Accounting Period** and click the **[Search]** button.
3. Choose an EFT query line and click the **[Details]** button to view the Query Detail screen.

Note: If Treasury provided information about an Offset, follow Steps 7-9. If there is no offset information to record, skip to **Section 4.7.2: What does the Check Query Summary Window Display?**

Record Treasury's Offset information in the **Offset Amount** section. Enter the **Offset Amount** and a description if desired in the **Offset Information** field. Then click the **Save** button to save the offset information.

5. Click the **Inbox** hyperlink in the **Link Strip** to return to your Inbox.

4.7.2 What does the Check Query Summary Window Display?

The screenshot shows the 'Check Query Summary' window with several sections:

- General:** Displays Disbursing Office (KC6), Check Symbol (310), Check Number (12743055), Check FY (2008), Check Date (11/06/2007), Payment Amount (\$2,570.36), Cancel Type, Manual Check, and Bank Code.
- Schedule Information:** Shows Schedule FY (2008), Schedule Category (Treasury Disbursed Check), Schedule Type (Personal), and Schedule Number (GS08Q1365).
- Vendor:** Lists Code (E323402107) and Name (MILLER, WARREN L).
- Offset Amount:** Shows Offset Amount (\$0.00) and a scrollable Offset Information area.

[Go to top of page](#)

- **General** (section)
 - **Disbursing Office**—The disbursing office that issued the check. Updated by the check posting process, the Treasury reconciliation process, and Manual check transactions.
 - **Check /Trace Number**—The number that identifies the check. Updated by the check posting process, the Treasury reconciliation process, and Manual check transactions.
 - **Payment Date**—The date the check payment was disbursed.
 - **Cancel Type**—Indicates whether the check payment has been canceled, and if so, the type of cancel (i.e., replacement or deletion).
 - **Bank ABA/BIC**—The bank code that defines the bank to the system. Must be valid on the Bank maintenance table.
 - **Check Symbol**—The check symbol assigned to the disbursing office code.
 - **Check FY**—The fiscal year the check was printed. Updated by the check posting process, the Treasury reconciliation process, and Manual check transactions.
 - **Payment Amount**—The amount of the check payment.
 - **Manual Check**—Indicates whether the check was written manually. Updated by Manual Check transactions.
- **Schedule Information** (section)—Displays the Schedule Category, Schedule Type, and Schedule Number that is associated with the Check payment.
- **Vendor**—Provides the specific Vendor Name, Vendor Code, and Address Code.
- **Offset Amount** (section)—Records Treasury's Offset Amount and Information.

4.7.3 How do I View Each Payment Line?

1. Complete Steps 1–4 in **Section 4.7.1: How Do I View the Check Query?**
2. Click the **Check Query Details** tab to view the specific payment authorization document lines included in this payment. The Check Query Details page is displayed.

3. Users are able to view a list of all the payment document lines.

Highlight a record so that the information populates the fields at the bottom of the page.

4. Click the **[View Document]** button to view the payment document.
5. Click the **Inbox** hyperlink to return to your inbox.

4.8 Reviewing the Prompt Pay Query

The Prompt Pay Query measures the total number of payments made on time based on the disbursement type. In addition to reflecting accountability and integrity, more on-time payments equates to fewer interest and penalty outlays. GSA users may search for these metrics by accounting period range and disbursement type. The query details display the percentage of payments paid on time and the percentage paid late grouped by disbursement type and disbursing office for the accounting period.

4.8.1 How can I View the Prompt Pay Query?

1. Select **Queries—Metrics—Prompt Pay Query** from the menu bar. The Prompt Pay Query page will be displayed.

Prompt Pay Query

5 Disbursement Cancellations

Payment cancellations should be entered immediately into Pegasys by creating a Disbursement Cancellation document. When Treasury sends the Cancellation Reconciliation information to GSA via GOALS, that information should be recorded on the Disbursement Cancellations Awaiting Reconciliation Query.

5.1 Cancelling a Payment

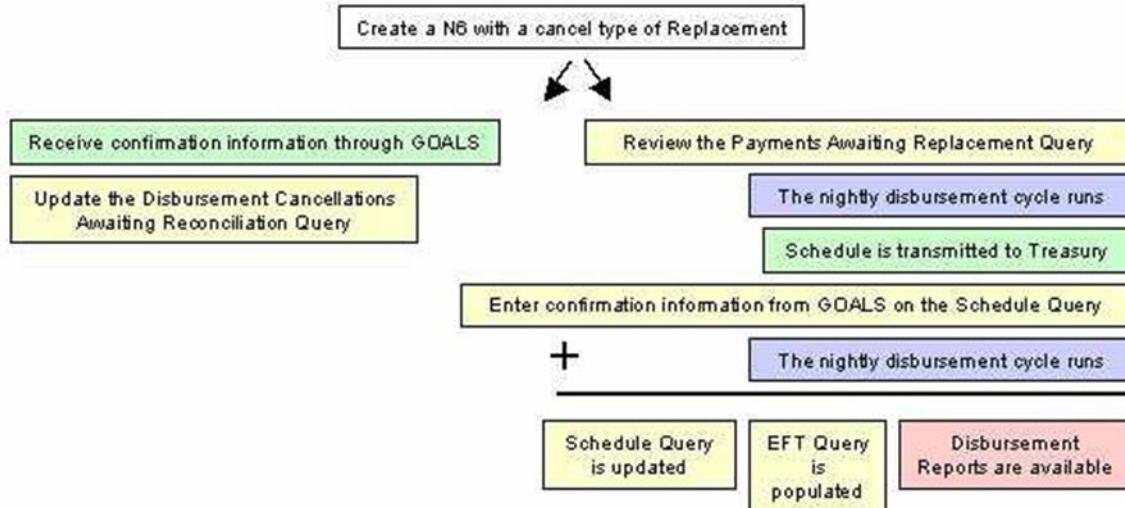

A single Disbursement Cancellation document enables a user to cancel a payment for a number of scenarios. For example, the document allows a user to replace a check if a payment was lost, and it is also possible to cancel a payment and re-open the invoice so that it can be corrected. This document can also be used to delete a payment and close the chain if the invoice will never be paid.

5.1.1 How do I Replace a Payment exactly as it was?

Example: If a vendor's paper check was ruined and GSA needs to replace the payment, the user would process a **Disbursement Cancellation** and choose a cancel type of **Replacement**. This will resend the original payment to the vendor without re-calculating interest or discounts.

As **Figure 5-1: Replacing a Payment** shows, a user must create the document with a cancel type of Replacement and record Treasury's cancel confirmation information on the Disbursement Cancellations Awaiting Reconciliation Query. Users can view the replaced payment by going to the Payments Awaiting Replacement Query. Once the payment is selected from this query by the nightly cycle, the disbursement follows the same process as described in **Section 5.2.1: How Do I Create a Payment Cancellation Document?** and **Section 5.2.3: How Do I Update the Disbursement Cancellations Awaiting Reconciliation Query?** provide step-by-step instructions on how to create the Disbursement Cancellation, how to update the Disbursement Cancellations Awaiting Reconciliation Query, and how to view the replaced payment on the Payment Awaiting Replacement Query.

Figure 5-1: Replacing a Payment

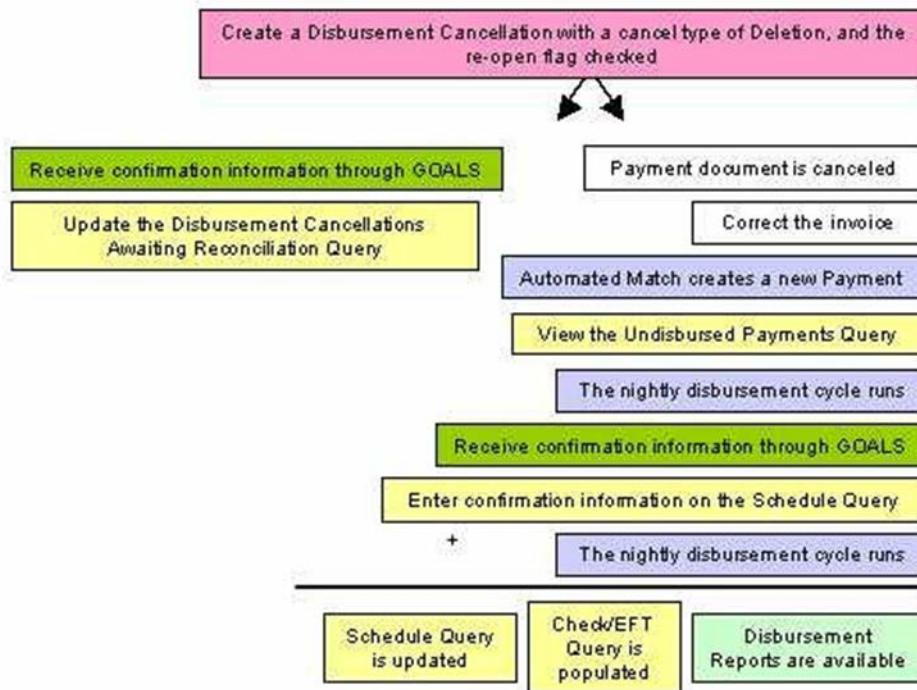

5.1.2 How do I Delete a Payment and Re-open the Purchasing Chain?

Example: If a disbursement needs to be cancelled so that a change can be made to the invoice, the user would process a **Disbursement Cancellation** with a cancel type of **Deletion** and **Re-Open** (check box) checked. This would cancel the payment document and re-open the invoice so that it could be modified.

As **Figure 5-2: : Deleting a Payment to Correct the Invoice** shows, a user must create the document with a cancel type of deletion with **Re-Open** (check box) checked. After the invoice is corrected and processed, the Automated Match batch job creates the new payment document. Users can then follow the exact same process as described in **Chapter 1:** where the payment is reviewed on the Undisbursed Payment Query. The payment will be selected for disbursement on the newly calculated schedule date.

Section 5.2.1: How Do I Create a Payment Cancellation Document? and Section 5.2.3: How Do I Update the Disbursement Cancellations Awaiting Reconciliation Query? provide step-by-step instructions on how to create the Disbursement Cancellation and how to update the Disbursement Cancellations Awaiting Reconciliation Query.

Figure 5-2: Deleting a Payment to Correct the Invoice

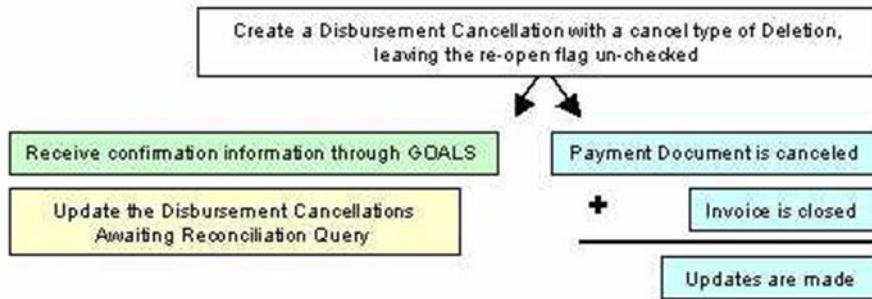

5.1.3 How do I Delete a Payment and Close the Purchasing Chain?

Example: If GSA decided that it should never have paid a specific invoice (and will not pay it in the future), it would be possible to process a **Disbursement Cancellation** and choose a cancel type of **Deletion**, without checking the **Re-Open** (check box). This would cancel the prior payment and close the invoice.

As **Figure 5-3: : Deleting a Payment to Close the Purchasing** Chain shows, a user must create the document with a cancel type of deletion without checking the **Re-Open** check box. The corresponding payment documents are canceled and the dollars are returned to the budget.

Section 5.2.1: How Do I Create a Payment Cancellation Document? and **Section 5.2.3: How Do I Update the Disbursement Cancellations Awaiting Reconciliation Query?** provide step-by-step instructions on how to create the Payment Cancellation and how to update the Disbursement Cancellations Awaiting Reconciliation Query.

Figure 5-3: Deleting a Payment to Close the Purchasing Chain

5.2 Disbursement Cancellation Steps

As stated above, payment cancellations should be entered immediately into Pegasys by creating a **Disbursement Cancellation** document. If Treasury provides the cancellation reconciliation information before the document is processed, the data should be recorded on the Disbursement Cancellation form. If the information is received after the document is processed, it is possible to record the information on the Cancellations Awaiting Reconciliation Query. Once the cancellation confirmation information from Treasury is recorded, the confirmation is posted via the next nightly disbursements cycle.

Note: No more than one line should ever be added to a Disbursement Cancellation document. Additional payments to be cancelled should be entered on new documents.

5.2.1 How Do I Create a Payment Cancellation Document?

1. Select **Transactions—Automated Disbursements—New— Disbursement Cancellation** from the Pegasys menu bar. The New Disbursement Cancellation page is displayed.

2. Enter the appropriate **Disbursement Cancellation** document in the **Document Type** field.
3. Click the **Generate** button for Pegasys to populate a unique document number in the **Document Number** field.
4. Enter the appropriate **Security Organization**.

Note: You may search for the **Security Org** by clicking the **Security Org** hyperlink. The **Search- Security Organization** page is displayed. Enter **Search** criteria. Click the **[Search]** button. **Search** results are displayed. To select a **Security Organization** click corresponding **[Select]** button. The **New Disbursement Cancellation** page is displayed with the **Security Org** field completed.

- If left blank, the user's default security organization will populate this field.
5. Click the **[Finish]** button. The **Header** page is displayed.

Note: No more than one line should ever be added to a Disbursement Cancellation document. Additional payments to be cancelled should be entered on new documents.

9. Enter the following information associated with the payment:

- Enter the **Disbursing Office**.
- If the disbursement was a Check, enter the appropriate **Check Symbol**.
- Enter the **Check/Trace Number**.
- Enter the **Check/Payment Date**, the date the payment was disbursed.
- Select the appropriate **Cancel Type** of Replacement or Deletion from the drop down menu. Refer to **Section 5.1.1 How do I Replace a Payment exactly as it was?** for descriptions of each type.
- If the Cancel Type of Deletion is selected, check the **Re-Open** check box to re-open the invoice associated with the cancelled payment.
- Select Yes or No from the **Available Indicator** drop down menu. This will indicate whether the cancellation is available (SF-1098) or unavailable (SF-1184).
- If the disbursement was an EFT payment, select “ACH (CCD+/PPD+)” or “ACH (CTX)” from the **Category** drop down menu. If the disbursement was a Check, select “Treasury Disbursed Check” from the **Category** drop down menu. The payment information will then default into the document.
- Enter the **Cancel Number** and **Cancel Confirm Date** if it is known.

10. Click the **[Verify]** button to ensure that the data has been entered correctly.

11. When successfully verified, click the **[Submit]** button to submit the Disbursement Cancellation form to Workflow for processing.

5.2.2 How Do I Delete a Disbursement Cancellation Document?

5.2.2.1 How Do I Delete a Disbursement Cancellation Form?

If the Disbursement Cancellation form is not yet processed, it is possible to delete the form by following the instructions below.

1. Select **Transactions—Automated Disbursements—Delete** from the Pegasys menu bar. The **Delete** page is displayed.

2. Enter the appropriate document type in the **Document Type** field.

Enter the Document Number in the **Document Number** field.

3. Click the **[Search]** button.

Note: The search results will display at the bottom of the page.

4. Highlight the document record. Click the **[Delete]** button.
5. Click **[Yes]** to delete the form. The **Delete** page will be displayed. System messages indicate that the form was deleted successfully.

5.2.2.2 How do I Cancel a Processed Disbursement Cancellation Document?

1. Select **Transactions—Automated Disbursements—Cancel** from the Pegasys menu bar. The Cancel page is displayed.

5. Click the [**Submit**] button to process the cancellation.
6. The Inbox will be displayed. System messages indicate the form was submitted for processing successfully.

Note: Corrections to Disbursement Cancellation documents are not allowed. If an update is needed, the Disbursement Cancellation document must be cancelled and re-entered. Once a Disbursement Cancellation document has been confirmed by the nightly cycle (after cancellation information has been recorded) it may no longer be cancelled.

5.2.3 How Do I Update the Disbursement Cancellations Awaiting Reconciliation Query?

Treasury will provide cancel confirmation information for all cancelled disbursements. It is necessary to record that information on the Disbursement Cancellations Awaiting Reconciliation Query if this information is not known when the Payment Cancellation is processed. To do this, follow the directions below.

1. Select **Queries—Automated Disbursements—Disbursement Cancellations Awaiting Reconciliation Query** from the Pegasys menu bar. The **Disbursement Cancellations Awaiting Reconciliation Query** is displayed.

Save History Display 10 Items View as CSV Sort...

2. Enter the disbursing office in the **Disbursing Office** field.
3. Click the [**Search**] button.

Note: The query results will display in the middle of the page.

4. Select a document record, and the information about that payment will populate the fields at the bottom of the page.
5. Select **Disapprove** from the **Disbursement Approval** drop down list and click the [**Save**] button. This will hold the payment on the Payments Awaiting Replacement Query until it is approved again.
6. To approve the payment, select **Approve** from the **Disbursement Approval** drop down list and click the [**Save**] button

Note: Payments cancelled for replacement will default as approved on the Payments Awaiting Replacement Query.

5.2.6 Can I view the Disbursement Cancellation Document in a reference query?

Yes, querying of Disbursement Cancellations allows users to view the Disbursement Cancellation (CX) document in the Reference query as shown in [Figure 5-1] below with visibility and auditability for cancelled checks and EFT payments. The CX has been a special case, compared to other transactions in the Reference query, because its references are indirect. That is, the CX directly references a disbursement schedule detail, which itself may consist of multiple payment transactions. By showing a CX (and cancellation type) in a payable document's Reference query, it is easier for agencies to quickly identify whether and how (e.g., for Deletion, Reissue, or Replacement) a payable's disbursement has been cancelled.

Figure 5-1: Reference Query Showing CX Document

Summary								
Document	Doc Typ	Doc Num	Status	Amend #	Doc Date	System Date Time	Doc Amt	Cost Am
o Disbursement Cancellation	CX	201401090001	Processed		01/09/2014	01/09/2014 18:25:58	\$7,528.78	\$0.0
Referenced							\$0.00	\$0.0
▶ Payment Voucher	PV	201311220006	Processed		01/14/2014	01/14/2014 14:57:32	\$1,022.90	\$0.0
▶ IPP Payment Voucher	IPV	201308300004	Processed		04/01/2014	04/08/2014 11:15:45	\$0.00	\$0.0

Since the CX and MX post to the journals using the associated payment transaction document type instead of its own document type, Pegasys will return a message directing the user to query the associated payment transaction document type.

6 Manual Schedules

Manual schedules are created outside of Pegasys and transmitted to Treasury via the Electronic Communications System (ECS). It is then necessary to record this transmission in Pegasys. To record a manual schedule in Pegasys, the manual schedule information should be entered on the invoice. This information will be copied forward onto the payment that is created through Automated Match. Once the first payment is processed, a manual schedule record is placed on the Schedule Query and is available for review. Treasury's confirmation information should be recorded on the Schedule Query when it is received. The nightly cycle of batch jobs will then update all the payments associated with the manual schedule.

6.1 How Do I Record Manual Schedule Information On An Invoice?

1. Select **Transactions—Purchasing—New—Match Invoice** from the Pegasys menu bar. Create the appropriate match invoice document.
2. Complete the match invoice as usual and then select the **Disbursing Information** page.

3. Normally, the information on the **Disbursing Information** page will default. For purposes of entering a manual schedule, it is necessary to enter the following fields:
 - **Disbursing Method**—Select the Check/EFT disbursing method from the drop down list.
 - **Disbursing Model**—Select Treasury Disbursing from the drop down list.
 - **Payment Category**—The type of vendor being paid. Determines whether or not the payment is subject to Treasury Offsets and as a result, defaults to Vendor. Other valid value is Miscellaneous.
 - **Line Code**—Used to crosswalk user defined payment category to type of vendor being paid. Valid values are Vendor and Miscellaneous.
 - **Payment Type**—Select the appropriate payment type. You may search for the payment type by clicking the Payment Type hyperlink.
 - **Manual Flag**—Check this box to indicate that the schedule was transmitted manually.
 - **Fiscal Year**—Enter the current fiscal year (e.g., 2006).
 - **Type**—Select Corporate or Personal
 - **Number**—Enter the Manual Schedule Number.

- **Sequence Number**—Enter the sequence number “1”. For subsequent payments referencing the same manual schedule number, simply use the next available sequence number.

Note:

The Manual Schedule Number should follow this naming convention: GSRXNY###.

Where GS = constants, R= region, N = sequential number, Y = last digit of Fiscal Year, ### = Julian date, and X = Wires: W, Special check: C, EFT : E.

In Regions 6 and 7, this number will be provided by Operations.

4. Click the [**Verify**] button.
5. After the form is successfully verified, click the [**Submit**] button to submit the form to Workflow for approvals or processing.
6. Allow the payment document to be created by automated match. The manual schedule information entered on the invoice will be displayed on the **Disbursing Information** page of the payment.
7. Once the payment is processed, a record of the manual schedule will be created and ready for review on the Schedule Query.

6.2 How Do I View the Manual Schedule I Just Created?

1. Select **Queries—Automated Disbursements—Schedule Query** from the Pegasys menu bar. The **Schedule Query** is displayed.

The screenshot shows the 'Schedule Query' search criteria interface. It includes fields for FY (Fiscal Year), Schedule Category, Schedule Type, Disbursing Model, Schedule Number, Manual Schedule (set to Yes), Disbursing Office, Schedule Action, Confirmed/Rejected Date, Pre-printed Number, Submission Date, and Posted by Treasury/FRB. At the bottom are 'Search' and 'Clear' buttons, and a toolbar with 'New', 'Details', 'Delete', 'Display 10 Items', 'View as CSV', and 'Sort...' buttons.

2. Enter the Manual Schedule number in the **Schedule Number** field and then click the **[Search]** button.

Note: The query results will populate the bottom portion of the page.

3. Highlight the schedule record you wish to view and click the **[Details]** button. The **Schedule Query Detail** page is displayed.

The screenshot shows the 'Schedule Query Detail' window with three main sections:

- Schedule Information:** FY: 2011, Schedule Category: ACH (CCD+/PPD+), Disbursing Office: E2, Manual: Yes, Vouchered Amount: \$40.00, Payment Category: VENDOR, Posted by Treasury/FRB: Posted, Disbursing Model: Treasury Disbursing, Line Code: Vendor, Schedule Type: Personal, Vouchered Transaction Amount: \$40.00, Schedule Number: GS11D001, Transaction Currency: USD, Total Number of Payments: 1, Number of Confirmed Payments: 1, Fully Expended: checked, Details Posted: checked.
- Output File:** Submission Date: 10/23/2010, View Output, Output File Name: [empty], Backout Requested: [checkbox].
- Confirmed Information:** Detail Level Confirmation/Rejection: [checkbox], Confirm, Schedule Action: Confirm, Backout Requested: [checkbox], Confirmed/Rejected Amount: \$40.00, Pre-printed Number: [empty], Check Symbol: [empty], Confirmed/Rejected Transaction Amount: \$40.00, Beginning Check/Trace Number: 00000001, Ending Check/Trace Number: 00000001, Accounting Period: [empty].

6.2.1 What does the Schedule Information Window Display?

The **Schedule Query Detail** window displays summary schedule information for each schedule.

- **Schedule Action**
 - **Confirm**—Treasury has confirmed the schedule and the payment has been sent to the vendor.
 - **No Action**—The information has been sent to Treasury but no confirmation has been received.
 - **Rejected**—Treasury has rejected the schedule and has sent it back to GSA without disbursing.
 - **In Progress**—Not all of the Detail Lines in the Schedule have been confirmed/rejected. A Schedule with In Progress as the Schedule Action will not be picked up by Treasury Reconciliation.
 - **Complete**—All of the Payment Lines within the Schedule have either been confirmed or rejected. This Schedule will be picked up by Treasury Reconciliation, but some of the Payments within the Schedule may have been rejected and will not be picked until they are confirmed.
 - **Manual Dropdown**—A value of Yes indicates that the schedule is a manual schedule.
 - **Vouchered Transaction Amount**—The total amount of the payments on the schedule.
- **Output File**

- **Submission Date**— The date the schedule was created by the Pegasys disbursements batch process. Kansas City and Fort Worth disbursing offices will run these batch processes during the nightly cycle so the schedule will be transmitted to Treasury on the next business day. For TMR disbursements, the schedule will be submitted on the same day as it was created.

6.3 What If I want to Cancel the Manual Schedule?

If a manual schedule was created in error, it is possible to cancel the schedule as long as it has not been confirmed in Pegasys. Simply cancel the payment document(s) and then delete the schedule from the Schedule Query. As each payment on the manual schedule is cancelled, the Detail records are removed from the Schedule record. When only the Schedule Summary remains, you can delete the schedule by following the instructions below.

1. Select **Queries—Automated Disbursements—Schedule Query** from the Pegasys menu bar. The **Schedule Query** page is displayed.

The screenshot shows the 'Schedule Query' search criteria interface. It includes fields for FY (highlighted with a yellow box), Schedule Category, Schedule Type, Disbursing Model, Schedule Number, Manual Schedule (set to Yes), Disbursing Office, Schedule Action, Confirmed/Rejected Date, Pre-printed Number, Submission Date, and Posted by Treasury/FRB. Below the search criteria are buttons for New, Details, Delete, Display (set to 10 items), View as CSV, and Sort... At the bottom left are Search and Clear buttons.

2. Enter the Manual Schedule number in the **Schedule Number** field and then click the **[Search]** button.

Note: The query results will populate the bottom portion of the page.

3. Highlight the schedule record you wish to delete and click the **[Delete]** button.
4. A confirmation message will display asking, "Are you sure you want to delete?" Click the **[Yes]** button.

6.4 What Happens After the Manual Schedule is Sent to Treasury?

After the manual schedule is sent to Treasury, Treasury will disburse the payment(s). In three to five days, Treasury will send the confirmation information for the schedule via GOALS.

Schedule confirmation information should be entered normally (refer to **Section 4.3.1: How Do I Record Treasury's Confirmation or Rejection of the Schedule?**).

6.5 What Do I Do if Treasury Rejects the Manual Schedule?

Normally, if Treasury rejected a schedule, the rejection information would be recorded on the Schedule Query and all the payments would go back to the Undisbursed Payment Query. However, if Treasury rejects a manual schedule, it is necessary for a user to make the necessary corrections to the invoice or payment documents and re-submit the schedule to Treasury. Rejection information is not allowed to be recorded on the Schedule Query for a manual schedule.

7 AD Reports

There are many reports available in the Automated Disbursements subsystem. Details on each one can be found in the descriptions below. This chapter will provide instructions on how to view a report and provide a detailed list of each report and its content.

7.1 How Can I View a Report?

1. Select **Utilities—Reports—Run Reports** from the Pegasys menu bar. The **Run Reports** page is displayed, listing all the available reports in Pegasys.

2. Click the expand icon for the **Automated Disbursements** folder.
3. Highlight the report to be viewed or printed.
4. Click the **Select Report** button. The report parameter page will be displayed.
5. Enter all appropriate parameters in the **Parameters**
6. Click **[Submit]** to run the report.
7. To view the report, select **Utilities—Reports—Report Status** from the Pegasys menu bar.
8. Select **Automated Disbursements** from the **Report Subsystem** drop-down box. In the **Logon ID** field, type your User ID. Enter any additional search criteria.
9. Click the **[Search]** button.
10. Highlight the **Automated Disbursements** report record. Then click the **[Details]** button. The **Report Executions** page is displayed.

11. Highlight the latest execution record. Ensure the **Report Status** is **Complete**. Then click the **[Output]** button. The report appears onscreen in the specified report output format.
12. If the report has returned in Adobe Acrobat, click the **[Print]** button on the Adobe Acrobat toolbar. If the report did not return in Adobe Acrobat, click once on the displayed report and select **File—Print** from your web browser's menu bar.
13. Click the "X" to close the web browser and return to the **Report Status** page.

7.2 Disbursement Reports

7.2.1 Daily Payment Summary Report

The Daily Payment Summary Report retrieves payment date, payment type, disbursing office, number of payment records, and amount totals for that particular date range. The report runs based on the disbursing office and document date entered. *Figure 7-1: Daily Payment Summary Parameters* displays the required parameters for the Daily Payment Summary report.

Figure 7-1: Daily Payment Summary Parameters

Parameter Name	Description
Disbursing Office (required)	The Disbursing Office to be selected for the report. Must be valid in the Disbursing Office Maintenance table.
Document Date (required)	The document date the report should include.

7.2.2 Foreign Currency Report

The report shows the total amount of foreign payments processed by Treasury for payments made by Fleet overseas. The report shows the schedule number of the batch, Routing numbers, Account Numbers, Invoice numbers, Foreign Dollar amounts, Currency codes, and US Dollar amount based upon the conversion made by Treasury. There is also a summary section at the end of the report that lists the Country codes on the schedule and the Total Foreign Dollar amount and Total US Dollar amount for each country. *Figure 7-2: Foreign Currency Parameters* displays the parameters for the Foreign Currency report.

Figure 7-2: Foreign Currency Parameters

Parameter Name	Description
Schedule Number (required)	The schedule number to be selected for the report.

7.2.3 Lease Undisbursed Payments Report

The Lease Undisbursed Payments Report enables Finance officers to retrieve information on Lease payments that have not yet been disbursed. For each payment, the report displays the document number, ACT number, schedule information, vendor information, and the payment amount. Additionally, the report displays the invoice number, fund, payment date and discount and prompts pay considerations for each payment document line. *Figure 7-3: Lease Undisbursed Payment Parameters* displays the parameters for the Lease Undisbursed Payment report.

Figure 7-3: Lease Undisbursed Payment Parameters

Parameter Name	Description
From Schedule Date (required)	The from schedule date to be selected for the report.
To Schedule Date (required)	The to schedule date to be selected for the report.
Region	The region that should be selected for the report.
Document Type	The document type that should be selected for the report.
Vendor Code From	The vendor code from that should be selected for the report.
Vendor Code To	The vendor code to that should be selected for the report.
Display Vendor H	A checkbox to indicate if the Vendor H should be displayed.
BBFY'/EBFY	The BBFY/EBFY that should be selected for the report.
Fund	The Fund that should be selected for the report.
Approval Status	The approval status for the report.
Sort Criteria 1-3	The sort criteria that should be selected for the report.

7.2.4 Interest Penalties and Late Charges Report

This report displays the disbursing office, fund, organization code, reason code, invoice number, interest amount, total paid amount, vendor code, and schedule date for interest payments.

Figure 7-4: Interest Penalties and Late Charges displays the parameters for the Interest Penalties and Late Charges report.

Figure 7-4: Interest Penalties and Late Charges Parameters

Parameter Name	Description
Disbursing Office (required)	The disbursing office to be selected for the report.

Month/Year (required)	The month/year to be selected for the report.
Fund	The fund that should be selected for the report.

7.2.5 Undisbursed Payment Summary by PA Type Report

The Undisbursed Payments Report enables Finance officers to retrieve information on payments that have not yet been disbursed. For each payment, the report displays the document number, ACT number, schedule information, vendor information, as well as the payment amount. Additionally, the report displays the invoice number, fund, payment date, as well as discount and prompt pay considerations for each payment document line. *Figure 7-5: Undisbursed Payment Summary by PA Type Parameters* displays the parameters for the Undisbursed Payments report.

Figure 7-5: Undisbursed Payment Summary by PA Type Parameters

Parameter Name	Description
Disbursing Office (required)	The disbursing office to be selected for the report.

7.2.6 Lease Undisbursed Payments Report

The Lease Undisbursed Payments Report enables Finance officers to retrieve information on Lease payments that have not yet been disbursed. For each payment, the report displays the document number, ACT number, schedule information, vendor information, and the payment amount. Additionally, the report displays the invoice number, fund, payment date and discount and prompt pay considerations for each payment document line. *Figure 7-6: Lease Undisbursed Payments Parameters* displays the Lease Undisbursed Payments report parameters.

Figure 7-6: Lease Undisbursed Payments Parameters

Parameter Name	Description
Schedule Date From (required)	The schedule date from to be selected for the report.
Schedule Date To (required)	The schedule date to to be selected for the report.
Region	The region to be selected for the report.
Document Type	The document type to be selected for the report.

Vendor Code From	The vendor code from to be selected for the report.
Vendor Code To	The vendor code to to be selected for the report.
Display Vendor H	Indicates if the Vendor H should be displayed.
BBFY/EBFY	The BBFY/EBFY to be selected for the report.
Fund Code	The fund code to be selected for the report.
Approval Status	The approval status to be selected for the report.
Sort Criteria 1-3	The sort criteria to be selected for the report.

7.2.7 Discount Report

This report lists the discounts earned and lost by GSA. The report is grouped into two sections. The first section shows the summary of the discounts earned and lost by fund. It displays the information for the current month and year-to-date. The second section shows the detail of each invoice that offered a discount and whether the discount was earned or lost. *Figure 7-7: Discount Report Parameters* displays the Discount report parameters.

Figure 7-7: Discount Report Parameters

Parameter Name	Description
Disbursing Office (required)	The Disbursing Office to be selected for the report. Must be valid in the Disbursing Office Maintenance table.
Fiscal Month (required)	The month of activity that the report should include.
Fiscal Year (required)	The year of activity that the report should include.
Fund Code	The fund code to be selected for the report.

7.2.8 Payment History Report

The Payment History report enables Finance to retrieve invoices by vendor TIN number. The report displays each payment document as well each corresponding accounting line for all payments within the range defined by the report parameters. The available parameters are Vendor TIN Number, Vendor Address Code, Invoice Number, Payment Doc Type, Payment Doc Number, Fund Code, Program, Title, Payment Date Range as well as Payment Amount range. Vendor TIN Number is a required parameter. *Figure 7-8: Payment History Parameters* displays the Payment History report parameters.

Figure 7-8: Payment History Parameters

Parameter Name	Description
Vendor Tin Number	The unique vendor identification number.
Vendor Address Code	The code that specifies the office address for the vendor.
Invoice Number	The invoice number assigned by the vendor.
Payment Doc Type	The document type to be selected for the report.
Payment Doc Number	The unique number that identifies the payment document.
Fund Code	The fund code to be selected for the report.
Program	The Program to be selected for the report.
Title (Act Number)	The unique NEAR identification number for the payment document.
Payment Date From	The earliest payment date for which the report should be run.
Payment Date To	The last payment date for which the report should be run.
Amount Range From	The beginning dollar amount for which the report should be run.
Amount Range To	The ending dollar amount for which the report should be run.

7.2.9 Payment Selection Detail Report

The Payment Selection Detail Report expands on the information from the Payment Selection Summary Report and lists the payment document lines within a payment sequence (i.e., each Check/EFT payment) for each schedule. It also lists each payment document line's accounting strip, line amount, invoice number, and line type (i.e., interest). *Figure 7-9: Payment Selection Detail Parameters* displays the Payment Selection Detail report parameters.

Figure 7-9: Payment Selection Detail Parameters

Parameter Name	Description
Schedule Date	The date Pegasys will begin the disbursements process in order to send the payment to Treasury in time.
Disbursing Office	The Disbursing Office to be selected for the report. Must be valid in the Disbursing Office Maintenance table.
Disbursement Run Number	The run number of the disbursements cycle in which the payments were processed.
Schedule Number	The unique schedule number associated with the schedule.
Doc Type	The document type of the selected payment documents.
Fund	The Fund of the selected payment documents.
BBFY/EBFY	The BBFY and EBFY of the selected payment documents.

7.2.10 Payment Selection Summary Report

The Payment Selection Summary Report enables Finance Officers to retrieve a summary view of all payments within a selected Schedule. The report lists a payment count as well as total amounts per document type and fund for all payments within the selected schedule. Additionally, it displays a grand total payment count and payment amount for the selected schedule. This report is run by the nightly cycle and e-mailed to the regions. *Figure 7-10: Payment Selection Summary* displays the parameters for the Payment Selection Summary report.

Figure 7-10: Payment Selection Summary Parameters

Parameter Name	Description
Schedule Date From	The beginning date when Pegasys will select the payment to begin the disbursing process.
Schedule Date To	The ending date when Pegasys will select the payment to begin the disbursing process.
Disbursing Office	The Disbursing Office to be selected for the report. Must be valid in the Disbursing Office Maintenance table.
Disbursement Run Number	The run number of the disbursements cycle in which the payments were processed.
Schedule Number	The unique schedule number associated with the schedule.
Fund	The Fund of the selected payment documents.

7.2.11 SF-1166 Report

The SF-1166 Report produces the SF-1166 forms for reporting to Treasury. For each Treasury schedule, the report lists the appropriations from which the payment is to be made by Treasury, as well as the total amount of payments per fund.

The report sorts the records by schedule category, type and number, agency location code, enclosure code, and appropriation (fund). *Figure 7-11: SF-1166 Parameters* displays the SF-1166 report parameters.

Figure 7-11: SF-1166 Parameters

Parameter Name	Description
Print Date	The date Pegasys began the disbursements process in order to send the payment to Treasury in time.

Disbursement Run Number	The run number of the disbursements cycle in which the payments were processed.
-------------------------	---

7.2.12 Undisbursed Payments Report

The Undisbursed Payments Report enables Finance officers to retrieve information on payment lines that have not yet been disbursed. For each payment line, the report displays the document number, schedule information, vendor information, as well as the payment amount. Additionally, the report displays the invoice number, fund, payment date, as well as discount and prompt pay considerations for each payment document line.

The parameters for the report include Schedule Date range, Disbursing Office, Document Type, Approval Status Indicator, Vendor Code range, and Fund Code. Three sort criteria parameters can be used to define the report's sort order. Valid sort criteria are Document Number, Disbursing Office, Schedule Date, Schedule Category, Fund, Title, Invoice Number, and Vendor Code. Schedule Date range and disbursing office are required parameters. *Figure 7-12: Undisbursed Payments Parameters* displays the Undisbursed Payments report parameters.

Figure 7-12: Undisbursed Payments Parameters

Parameter Name	Description
Schedule Date From	The beginning date when Pegasys will select the payment to begin the disbursing process.
Schedule Date To	The ending date when Pegasys will select the payment to begin the disbursing process.
Disbursing Office	The disbursing office code of the payments to be selected.
Document Type	The letter/number combination at the beginning of all document numbers that indicates the type of document.
Vendor Code From	The beginning of the range of vendor codes of the payments to be selected.
Vendor Code To	The end of the range of vendor codes of the payments to be selected.
Display Vend Held Pymts	If the report should display the vendor's held payments.
Fund	The Fund of the payments to be selected.
BBFY/EBFY	The BBFY, EBFY of the payments to be selected.
Approval Status	Indicator displays the approval status of a payment document.
Sort Criteria 1-3	The parameter used to determine how the report should be sorted. The following are valid values: C-Schedule Category, S-Schedule Date, D-Document Number, F-Fund, I-Invoice Number, S-Schedule Date, T-ACT Number, V-Vendor Code.

8 Reference Table Maintenance

The Pegasys Automated Disbursements (AD) subsystem uses information stored in a variety of tables. Each of these tables requires some kind of timely maintenance.

8.1 What Reference Tables Need to be Maintained on a Regular Basis?

8.1.1 Interest, Penalty, and Discount

This table needs to be updated for each new fund added to Pegasys. To do this, follow these instructions.

1. Select **Reference—Automated Disbursements—Interest, Penalty, and Discount Distributions** from the Pegasys menu bar. The **Interest, Penalty, and Discount Distributions** page is displayed.

Search - Interest, Penalty, and Discount Distributions

Search Criteria

BBFY:

EBFY:

Fund:

Partition:

Distribution Type:

Display 10 Items

2. Click the **[New]** button. The **Interest, Penalty, and Discount Distributions** page is displayed.

Interest, Penalty, and Discount Distributions

[Expand All](#) | [Collapse All](#)

General

BBFY:

Reimbursable Sub Object:	User Dimension 7:	User Dimension 8:	User Dimension 9:	User Dimension 10: Cost Organization:
Sub Cost Organization:	YBAI:	BETC:	Cohort Year:	PRC:

Derived Transaction Type Values

Transaction Type: Discount Lost (Memo): Discount Taken (Memo):

Data Entry Rules

Fund: Function:

- Enter the beginning and ending fiscal years in the **BBFY** and **EBFY** fields. These should match the beginning and ending fiscal years for the new fund. Enter the fund in the **Fund** field. Select the **Distribution Type** from the drop-down list

Note: You will need to add a separate record for each distribution type Interest, Penalty, and Discount (three records total for each fund).

- In the **Derived Accounting Dimension Values** section, enter the appropriate values.
- In the **Derived Transaction Type Values** section, enter the appropriate values.
- No entries need to be made for a distribution type of **Penalty**. One entry needs to be made for distribution types of **Interest** and **Discount**.
- For Interest enter **P** in the **Transaction Type** field except for funds 255F and 455F. For these funds, the Transaction Type for interest is **UEV**.
- For Discount, enter **N/A** in the **Transaction Type** field, except for funds 255F and 455F. For these funds, the Transaction Type for Discount is **DI**.
- In the **Data Entry Rules** section, enter the appropriate values. For a distribution type of **Penalty**, all fields will have a value of Principal. For a distribution type of **Interest** or **Discount**, all fields will have a value of **Principal**, except **Transaction Type**, which will have a value of **Entered**.
- Click the **[Save]** button to add the record to the table.
- Click the **Search - Interest, Penalty, and Discount Distributions** hyperlink in the **Breadcrumbs Track** to return to the previous page.
- Repeat this process for each distribution type for the fund.

8.1.2 Transaction Definitions

For each new Accounts Payable Document Type created, the Transaction Definitions table needs to have corresponding entries for all the disbursements process activities and new interest (IN) and discount (DI) transaction types.

Additionally, because the Transaction Definitions are fiscal year dependent, all transaction definitions associated with Automated Disbursements need to be rolled over at the beginning of each new fiscal year.

Ken Dressner has been responsible for setting up and maintaining the records in this table.

8.2 What Reference Tables need to be Updated Yearly?

8.2.1 Prompt Pay Types

The Interest Rate fields need to be updated twice yearly with the new interest rate when it is received from Treasury. To update the table:

1. Select **Reference—General Systems—Prompt Pay Types** from the menu onscreen. The **Search - Prompt Pay Type** page is displayed.

2. Enter the appropriate search criteria in the fields. Click the **[Search]** button.

Note: The search results will display at the bottom of the page.

3. Highlight a prompt pay type record and click the **[Open]** button. The **Prompt Pay Types** page is displayed.

Prompt Pay Type

- Update the value in the **Current Value of Funds Rate** field and click the **[Save]** button.

Note: This table is fiscal year dependent so the table is rolled over at the beginning of each new fiscal year. No other changes need to be made to the table at that time.

5. Click the **Inbox** hyperlink in the **Link Strip** to return to the Pegasys homepage.

8.2.3 Calendar Date Maintenance

At the beginning of a fiscal year, the Calendar Date table needs to be updated for all federal holidays. To update the table:

1. Select **Reference—Date—Calendar Dates** from the menu onscreen. The **Search – Calendar Date** page is displayed.

2. Enter the appropriate search criteria in the fields. Click the **[Search]** button.

Note: The search results will display at the bottom of the page.

3. Highlight a record for the date that indicates a holiday and click the **[Open]** button. The **Calendar Date** page is displayed.

4. Check the **Holiday** flag.
5. Click the **[Save]** button.
6. Click the **Calendar Date** hyperlink in the **Breadcrumbs Track** to return to the previous page.
7. Repeat for every holiday in the fiscal year.

8.3 What Reference Tables Need to be Rolled Over at the Beginning of Each Fiscal Year?

8.3.1 Payment Options

- Click the **Inbox** hyperlink in the **Link Strip** to return to Pegasys homepage

8.3.2 Schedule Numbers

The **Schedule Number Template Maintenance** table needs to be updated at the beginning of each new fiscal year with a new set of parameters. The table should include several sets of parameters for each schedule **Category** and **Type**. In the **Schedule Number Template Maintenance** window, a user enters the FY, Schedule Type, Payment Category and Schedule Category. The user then enters the format string, prefix, and starting and ending number. The Schedule numbers are then automatically created using those parameters.

Use format – GS+Fisc Year+Sched. Type+Seq #

8.3.3 Transaction Definitions

For each new Accounts Payable Document Type generated, the Transaction Definitions table needs to have corresponding entries for all the disbursements process activities and new interest (IN) and discount (DL) transaction types.

Additionally, because the Transaction Definitions are fiscal year dependent, all transaction definitions associated with Automated Disbursements need to be rolled over at the beginning of each new fiscal year.

Ken Dressner has been responsible for setting up and maintaining the records in this table.

8.3.4 Interest, Penalty, and Discount

This table is fiscal year dependent, so it needs to be rolled over at the beginning of each new fiscal year. Please note, however, that this table is Fund dependent as well and any updates to the fiscal year need to correspond to the fiscal year updates done on the actual Fund records.

1. Select **Reference—Automated Disbursements—Interest, Penalty, and Discount Distributions** from the Pegasys menu bar. The **Interest, Penalty, and Discount Distributions** page is displayed.

Search - Interest, Penalty, and Discount Distributions

New Open Copy Delete Display 10 Items View as CSV Sort...

2. Click the **[New]** button. The **Interest, Penalty, and Discount Distributions** page is displayed.

The screenshot shows a web-based application interface for managing financial distributions. At the top, there are 'Audit' and 'Save' buttons. Below them is a title bar 'Interest, Penalty, and Discount Distributions' with 'Expand All | Collapse All' links. The main area is divided into sections: 'General' and 'Derived Accounting Dimension Values'. In the 'General' section, the 'Fund' field is highlighted with a yellow border. The 'Derived Accounting Dimension Values' section contains numerous input fields for various accounting dimensions such as Program, Project Code, Sub Project, Activity, Region, Org Code, Sub Organization, Sub-Object Class, Revenue Source, Sub Revenue Source, Building, System, Vehicle Tag, Work Item, ABC Activity, Reimbursable Sub-Object Class, Reimbursable Sub Object, Sub Cost Organization, YBA, BETC, Cost Organization, Cohort Year, and PRC.

3. Enter the beginning and ending fiscal years in the **BBFY/EBFY** fields. These should match the beginning and ending fiscal years for the new fund. Enter the fund in the **Fund** field. Select the **Distribution Type** from the drop-down list.

Note: You will need to add a separate record for each distribution type Interest, Penalty, and Discount (three records total for each fund).

4. In the **Derived Accounting Dimension Values** section, enter the appropriate values.
5. In the **Derived Transaction Type Values** section, enter the appropriate values.
 - No entries need to be made for a distribution type of **Penalty**. One entry needs to be made for distribution types of **Interest** and **Discount**.
 - For Interest enter **IN** in the **Transaction Type** field.
 - For Discount, enter **DI** in the **Transaction Type** field.
6. Enter the appropriate values on the Data Entry Rules tab. For a distribution type of **Penalty**, all fields will have a value of **Principal**. For a distribution type of **Interest** or **Discount**, all fields will have a value of **Principal**, except **Transaction Type**, which will have a value of **Entered**.
7. Click the **[Save]** button to add the record to the table.
8. Click the **Search - Interest, Penalty, and Discount Distributions** hyperlink in the **Breadcrumbs Track** to return to the previous page.
9. Repeat this process for each distribution type for the fund.

9 Replace Values

This chapter details functionality referred to as **Replace Values**, that allows users to select and simultaneously change or delete one, many or all Header Accounting Lines(s) on a form or document at one time. GSA documents with Header Accounting Lines are elected for the **Replace Values** functionality.

In Pegasys, the **Replace Values** functionality is available for **most** subsystems. This chapter will describe how to use **Replace Values** on forms and documents in the **Accounts Payable** subsystem.

- **Section 9.1**—How Do I Replace Values for the Accounts Payable
- **Section 9.2**—Replace Values for Accounting Line(s)

9.1 How Do I Replace Values for Accounts Payable

Within the **Accounts Payable** subsystem the **Replace Values** features can be found on the following Accounts Payable forms or documents: Credit Card Cost Transfer, Credit Card Payment, and all Payment Authorization documents (**document category IP**). The **Replace Values** functionality is available when creating a new form or correcting an existing form or document. Please refer to *Figure 9-2: Accounts Payable Document Categories* for a display of Accounts Payable Document Categories that are affected by the **Replace Values** functionality. *Figure 9-3: Summary Tab Field Additions for Replace Values* lists fields added to the **Header Accounting Lines** page.

Replace Values functionality allow you to simultaneously change or delete one, many or all field values on a **Header Accounting Line(s)**. The change is made at one time and from one location. If the field is on the Header Accounting Lines summary page, you can review the change in a summarized format as well as on individual lines. When you make a change on the form, Pegasys will immediately make the change to the individual accounting line(s) as well as to the **Header Accounting Lines** summary page. The following section describes fields that were impacted by **Replace Values** functionality.

Figure 9-1: Replace Values Features

Field	Display	Description
Data-input	Data, except @	Fills in data for selected accounting lines.
Data-input	Blank	No change will be made for selected accounting lines.
Data-input	@	Deletes any existing data for selected accounting lines.
Check box	Filled with a check	Fills in a check for selected accounting lines.
Check box	Gray	No change will be made for selected accounting lines.
Check box	Blank	Deletes any existing checks for selected accounting lines.
Drop-down list box	A choice selected, except @	Fills in data for selected accounting lines.

Drop-down list box	Blank	No change will be made for selected accounting lines.
Drop-down list box	@	Deletes any existing data for selected accounting lines.
Radio button	One button filled	Only that button will be filled for selected accounting lines.
Radio button	All buttons blank	No change will be made for selected accounting lines.

9.2 How do I Replace Values for Accounting Line (s)?

Replace Values can be used on new forms that have been saved or those being corrected, and is accessed from the form's **Header Accounting Lines** summary page. After selecting the desired line(s), the system will provide **Copy**, **Remove**, **Reset**, or **Replace** options. Also, individual lines can be reviewed by highlighting the record and then clicking the **Header Accounting Line** hyperlink.

If you decide to replace the value of a line(s), highlight the line and click the **[Replace]** button. A page will be displayed with enabled data fields for you to selectively populate. You may enter values in one or multiple data fields. If the field value is unknown, click the reference field hyperlink to search for the appropriate value to enter in the desired field. After entering the values, click the **[Apply]** button on the form or document to apply the changes. A message will display requiring you to confirm whether or not you want to proceed with replacing the value(s). Answer **[Yes]** to the message to indicate that you wish to proceed. If the field is originally displayed on the **Header Accounting Lines** summary page, the **Header Accounting Lines** summary page will immediately display a list of the changes of all selected

lines. After all values have been applied, click the **[Verify]** button to check for errors. If the system displays errors, correct the error one line at a time, or use the **Replace Values** functionality to make corrections.

The **[Reset]** button is also available to restore the information on the selected lines back to the values, which were present when the form or document was last saved. If there are no errors and the document is **verified** successfully, click the **[Submit]** button to process the document.

9.2.1 How Do I Use Replace Values Functionality to Correct a Single Accounting Line?

To change field values on a Header Accounting Line(s) simply select the **Header Accounting Lines** tab, highlight the desired line(s) on the **Header Accounting Lines** summary page and click the **Replace Values** button to display an enabled blank screen to populate.

Note: Attach a brief Pegasys Memo to your form or document that describes why the line is being corrected. Pegasys Memo feature by accessible the Memos tab on the Form/Document.

The following steps detail how to apply **Replace Values** functionality to correct a single accounting line.

1. Select **Transactions—Accounts Payable—Correct** from the Pegasys menu bar onscreen. The **Correct** page is displayed.

The screenshot shows the 'Correct' search criteria page. It includes fields for Subsystem, Document Type, Document Number, Amendment Number, Document Category, From Accounting Period, To Accounting Period, From Date, To Date, Vendor (Code, TIN, DUNS), and Customer Account. There are also sections for Document Status (Processed, Rejected, Cancelled, Archived, Scheduled, Pending Approval, Held), User ID, Security Org, and Title. Buttons for 'Search' and 'Clear' are at the bottom, along with links for '+ Additional Criteria' and '+ Accounting'.

2. Check the desired document status check box from the **Document Status** group box.
3. Enter a document type in the **Document Type** field.
4. Enter the document number in the **Document Number** field.
5. Click the **[Search]** button.

Note: The search results will be displayed at the bottom of the page.

6. Highlight a document record and then click the [Correct] button. The **Header** page of the selected form or document is displayed.
7. Select the **Header Accounting Lines** tab. The **Header Accounting Lines** summary page is displayed.
8. Highlight the appropriate line. The [Replace] button becomes enabled.

For this example, the dollar amount of line #5 will be changed from \$90.00 to \$300.00.

9. Click the [Replace] button. The **Replace Values** page displayed.

The screenshot shows the 'Header Accounting Line' form with three main sections:

- General:** Contains fields for Line Type, Transaction Type, Prompt Pay Type, Fast Pay, Transfer Agency, Treasury Symbol, To/From, Period of Performance, End Date, Start Date, and Related Cost Type.
- Line Amounts:** Contains fields for Payment, Applied Credit, Taxes, Current Amount, Applied Prepayment Amount, Holdback Amount, and Suspension Amount. The Net Total field shows '\$0.00'.
- Document Reference:** Contains fields for Type, Number, Item, SubItem, Accounting, Final, and Misc.

10. Enter the appropriate field values. If no entry is made in a given field, no changes will be made to that field.

Note: Reference field hyperlinks to search pages are available.

11. In the **Line Amount** field, enter the desired dollar amount. For this example, enter **\$300.00**.
12. Click the [Apply] button. 13. The **Header Accounting Lines** summary page is displayed. The Line amount has now been replaced with \$300.00.
13. Click the [Verify] button.

If error messages are displayed, review the messages, and correct the form accordingly.

14. Click the [Submit] button to process the form.

9.2.2 How Do I Use Replace Values Functionality to Correct Multiple Accounting Lines?

Multiple lines may be selected from the **Header Accounting Lines** summary page to apply corrections. The field values of the multiple lines may be changed at one time and from one place.

Note: Attach a brief Pegasys Memo to the form or document that describes why the lines are being corrected. Pegasys Memo feature is accessible by clicking the Memos tab on the Form/Document.

The following steps detail how to use the **Replace Values** functionality to correct multiple lines on a form at one time and from one place.

1. Select **Transactions—Accounts Payable—Correct** from the Pegasys menu bar. The **Correct** page is displayed.

2. Check the desired document status check box from the **Document Status** group box.
3. Enter a document type in the **Document Type** field.
4. Enter the document number in the **Document Number** field.
5. Click the **[Search]** button.

Note: The search results will be displayed at the bottom of the page.

6. Highlight a document record and then click the **[Correct]** button. The **Header** page of the selected form or document is displayed.
7. Select the **Header Accounting Lines** tab. The **Header Accounting Lines** summary page is displayed.
8. Highlight the appropriate lines by clicking the associated check boxes. The **[Replace]** button becomes enabled.

In this example, the line amount for all lines will be changed to \$200.00 using **Replace Values**.

- Click the [**Replace**] button. The **Replace Values** window is displayed.

The screenshot shows the 'Header Accounting Line' form with the 'Replace Values' window open. The 'General' section contains fields for Line Type, Transaction Type, Prompt Pay Type, Fast Pay, Transfer Agency, Treasury Symbol, and Period of Performance. The 'Line Amounts' section shows current amounts for Payment, Applied Credit, Taxes, and Net Total (\$0.00). The 'Document Reference' section includes fields for Type, Number, Item, SubItem, and buttons for View and Default.

- Enter the appropriate field values. If no entry is made in a given field, no change will be made to that field.

Note: Reference field hyperlinks to search pages are available.

- In the **Line Amount** field, enter the desired dollar amount. For this example, enter **\$200.00**.
- Click the [**Apply**] button. The **Header Accounting Lines** summary page is displayed. The line amount will be \$200.00 for all lines.
- Click the [**Verify**] button.

If error messages are displayed, review the messages, and correct the form accordingly.

- Click the [**Submit**] button to process the form.

9.2.3 How Do I Remove Lines?

Pegasys allows users to simultaneously delete one, many or all accounting lines(s). Select the **Header Accounting Lines** tab and select the appropriate line(s). Next, click the [**Remove**] button. After clicking on the [**Remove**] button, the line(s) will be marked out and a trash can icon will appear next to the check box for the record. Click the [**Verify**] button. If error messages are displayed, review the messages, and correct the form accordingly. Click the [**Submit**] button to process the form or document. If all lines are deleted, you will not be able to process the form or document. Therefore, you must add another Header Accounting Line to the form or document to process successfully.

Once accounting lines are deleted, and the form has been processed or held/saved, the deleted Header Accounting Lines **cannot** be **restored**. If the form has not yet been processed or held/saved, the **Refresh** button can be used to **restore** the deleted Header Accounting Lines. In addition, you can navigate away from the Form/Document and then reopen it. All changes made prior to the last save will be lost. Therefore, once lines are deleted and the form is processed, you cannot use the **Refresh** or **Reset** functionality to retrieve the line(s).

Note: Attach a brief Pegasys Memo to your form or document that describes why the line(s) is being deleted. Pegasys Memo feature is accessible by clicking the Memos tab on the Form/Document.

The following steps detail how to delete line(s).

1. Select **Transactions—Accounts Payable—Correct** from the Pegasys menu bar. The **Correct** page is displayed.

2. Check the desired document status check box from the **Document Status** group box.
3. Enter a document type in the **Document Type** field.
4. Enter the document number in the **Document Number** field.
5. Click the **[Search]** button.

Note: The search results will be displayed at the bottom of the page.

6. Highlight a document line and then click the **[Correct]** button. The **Header** page of the selected form or document is displayed.
7. Select the **Header Accounting Lines** tab. The **Header Accounting Lines** summary page is displayed.
8. Highlight the appropriate lines by clicking the associated check boxes. The **[Remove]** button becomes enabled.
9. Click the **[Remove]** button.
10. The line(s) will become marked out, and a trash can icon will appear next to the check box for the record.

	Line Number	Amount Type	Transaction Template	BBFY	EBFY	Fund	Rep	Org Cd	Sub Org	B/A Proj Cd	Function	C/E	Sub Obj	Sub Src	Sub Rev F Src	Bldg Sys	Veh Tag #	Wrk Itm A
<input checked="" type="checkbox"/>	± \$2,592.00	0t		60-FF-09-	455F-	2000	-	495F 09	F9992107-	FE92-	-	FE74±	516	-	-	-	A07-	-

- Click the **[Verify]** button.

If error messages are displayed, review the messages, and correct the form accordingly.

- Click the **[Submit]** button to process the form.

At least one line must remain for the form to process.

9.2.4 How Do I Use Replace Values Functionality to Delete Values?

In addition to the **Replace Values** functionality allowing the user to simultaneously delete entire accounting line(s) associated with a form or document (see Section 9.2.3), specific values on selected line(s) may also be deleted. Field values may be deleted for drop-down menus, in text fields, and check boxes. The **Replace Values** functionality allows you to enter the "@" symbol in any enabled text field of the **Replace Values** input field to indicate that Pegasys should delete all pre-existing values. For drop down menus, select the null value. For check boxes, you can click twice to delete.

Note: Attach a brief Pegasys Memo to your form or document that describes why the line(s) is being deleted. Pegasys Memo feature is accessible by clicking the Memos tab on the Form/Document.

The following steps will detail how to apply the "@" symbol to delete the **Amount Values** for the selected lines.

- On the **Header Accounting Lines** summary page, highlight the appropriate lines by clicking the check boxes associated with each line. The **Replace** button becomes enabled.
- Click **[Replace]** button. The **Replace Values** page is displayed.

3. In the **Project Code** field, enter the “@” symbol.

Note:

- If you wish to delete values from any drop-down menu, select the null value.
 - To delete values from check boxes, click twice in the check box and it will become blank.
4. Click the **[Apply]** button. The **Header Accounting Lines** summary page will be displayed.

The values for the Project Code field will be deleted from all selected lines.

9.2.5 How Do I Use the Reset Lines Button?

The **Replace Values** functionality provides a **Reset** feature that allows the user to restore information on selected lines back to the state in which it was last saved. The **Reset Lines** button is found on the **Header Accounting Lines** summary page of the Form/Document.

The following steps describe how to use the **Reset Lines** button to restore the value of the lines selected in the example.

1. On the **Header Accounting Lines** summary page, highlight the appropriate lines by clicking the check boxes associated with each line. The **[Reset]** button becomes enabled.
2. Click the **[Reset]** button.

System message indicates that the reset line functionality is successful.

9.2.6 How Do I Use Replace Values to Change the Prompt Pay Type

The **Prompt Pay Type** data values enable Pegasys to automatically schedule payments for disbursement according to prompt payment regulations, vendor payment terms and available discounts. The **Prompt Pay** data field contains pre defined data values, which you may select to enter the **Prompt Pay Type**. The **Replace Values** functionality will allow you to select a different Prompt Pay value to replace the value for one or several payment lines from one location.

The following steps detail how to apply **Replace Values** functionality to select a data value for several payment lines.

1. Select **Transactions—Accounts Payable—Correct** from the Pegasys menu bar. The Correct page is displayed.

2. Check the desired document status check box from the **Document Status** group box.
3. Enter a document type in the **Document Type** field.
4. Enter the document number in the **Document Number** field.
5. Click the **[Search]** button.

Note: The search results will be displayed at the bottom of the page.

6. Highlight a document record and then click the **[Correct]** button. The **Header** page of the selected form or document is displayed.
7. Select the **Header Accounting Lines** tab. The **Header Accounting Lines** summary page is displayed.
8. Highlight the appropriate lines by clicking the associated check boxes. The **[Replace]** button becomes enabled.
9. Click the **[Replace]** button. The **Replace Values** page is displayed.

- Enter the **Prompt Pay Type** value.

Note: If the **Prompt Pay Type** field value is unknown, you may use the reference field hyperlink to search for a list of field values. Select a value. The selected Prompt Pay field value will populate in the **Prompt Pay Type** field.

- Enter any other appropriate field values. If no entry is made in a given field, no changes will be made to that field.

Note: Reference field hyperlinks to search pages are available.

- Click the **[Apply]** button.
- The **Header Accounting Lines** summary page will be displayed.

The **Prompt Pay** values are replaced with the selected field value.

- Click the **[Verify]** button.

If error messages are displayed, review the messages, and correct the form accordingly.

- Click the **[Submit]** button to submit the form to Workflow for approvals or processing.

10 Summary Tab

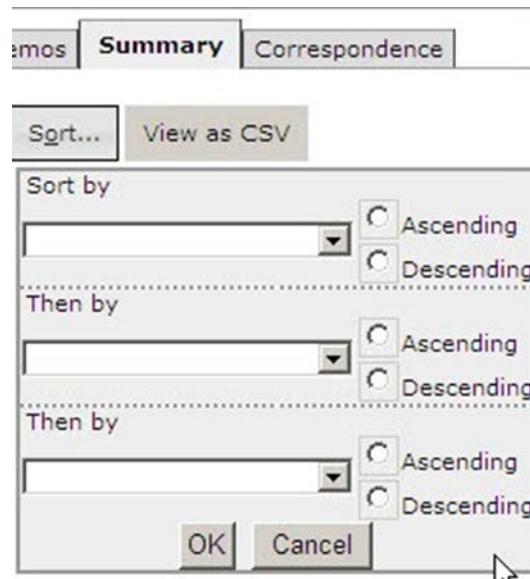

The Summary tab displays a summary of the header accounting and itemized lines. On this tab, users can add new lines, and review, modify, and delete existing lines. Users can also click the Sort button to help organize the lines for easier viewing.

The following steps describe how to use the Summary tab. These steps refer to header accounting lines but the same steps can be used for the Item Lines section on the “Summary Tab”.

1. To add a new line, click the **Add** button. *A new line will be displayed.*
2. To add information to the new line, click inside the cell and type in the information.

	Line Number	Amount	Trans
<input type="checkbox"/>	1	\$100.00	
<input checked="" type="checkbox"/>	3	\$0.00	

3. To default an accounting template, enter an accounting template in the Template cell, and click the **Default Accounting Template** button.
4. To default information from a referenced line, enter a Referenced Document Type and Document Number in the cells provided, and click the **Default from Referenced Line** button.
5. To update an existing line, select the desired line, click inside the desired cell(s) for the field that should be updated, and make the change.
6. To copy an existing line, select the desired line and click the **Copy** button. A new line will be created.
7. To remove an existing line, select the desired line and click the **Remove** button.
8. To see the header accounting line for a specific line, select the line, and click the **Details** button. The header accounting line will be displayed.
9. To sort accounting lines, click the **Sort** button. Choose the Sort criteria and click **OK**.

10. To view the accounting lines as a CSV, click the **View as CSV** button.
11. To move a column heading, click on a column heading and drag it to the desired location.
12. To expand or contract the column width, click on the vertical line before or after the column heading and drag outwards to increase the width or drag inwards to decrease the width size.

Add	Copy	Remove	Details	Def.
Header Accounting Lines				
	Line Number	Amount	Tran	
<input type="checkbox"/>	1	\$100.00		
<input checked="" type="checkbox"/>	3	\$0.00		

11 Do Not Pay Initiative

In order to accommodate Treasury's Do Not Pay initiative, GSA has the capability to create a vendor and/or payment file out of Pegasys that can be uploaded and processed in Do Not Pay. This will assist in efforts to reduce improper payments and allows users to process a matched data file that can be downloaded from the Do Not Pay portal containing matched data. This allows the ability to automatically update vendor records in Pegasys based upon matched data available from Do Not Pay. Users can record information in Pegasys regarding a vendor's Do Not Pay status, including Match Level, Match Type, Match Source, Match Date and a Description field for recording details of a vendor's Do Not Pay status. Additionally, overrideable warnings will occur on new obligations, payments, or agreements created containing a vendor after the vendor has been configured as "Do Not Pay".

At a high-level, the following modifications have been made in support of Do Not Pay:

- Vendor
 - The Vendor Code maintenance table and Vendor Form will be updated to allow users to record the following information regarding a vendor's Do Not Pay status:
 - Do Not Pay flag
 - Do Not Pay Match Date
 - Do Not Pay Match Level
 - Do Not Pay Match Type
 - Do Not Pay Match Source
 - Do Not Pay Status Description
 - Additionally, the Do Not Pay flag will be added to vendor searches throughout Pegasys, including the following queries:
 - Vendor Activity Query
 - Vendor Review Query
 - Invoice Query
- Monitoring Vendors' Do Not Pay Status:
 - An overrideable warning will be added to the following areas of Pegasys to notify a user if a vendor that is configured as "Do Not Pay" is used:
 - Obligations:
 - Order (IO)
 - Training Order (IT)
 - Award (QA)
 - Acquisition Order (QO)
 - Travel Authorization (TA)
 - Payments:
 - Payment Authorization (IP)
 - Imprest Fund (IF)
 - Travel Advance (TN)
 - Third Party Payment (TP)
 - Travel Voucher (TV)
 - Bank Withdrawal (BW)
 - Bills and Cash Receipts (Advance line type only)
 - External Agreements

- Contract maintenance table
- Blanket Purchase Agreement maintenance table
- Do Not Pay Output Files:
 - This item will include a new batch process that will allow GSA to pull vendor and/or payment data out of Pegasys using a variety of simple and complex parameters to create a vendor and/or payment file that can be uploaded to and processed by Do Not Pay.
- Do Not Pay Match Data Import:
 - This item will also include a new batch process that will allow agencies to process a matched data file that was downloaded from Do Not Pay and contains match data from the Do Not Pay system. This batch process will provide the capability for GSA to automatically update vendor records in Pegasys based upon match data from the Do Not Pay system.
- Do Not Pay Web Site:
 - This item will include the ability to configure the Do Not Pay URL under System Settings and a menu option for launching the Do Not Pay web site from Pegasys in the event that users want to review a vendor's current information in the Do Not Pay system.

Figure 11-1: Vendor Activity Query

The screenshot shows a search criteria form titled "Vendor Activity Query". The "Search Criteria" section contains numerous input fields and dropdown menus. A specific dropdown menu labeled "Do Not Pay" is highlighted with a red rectangular border. Below this section is another labeled "NAICS" which includes fields for "NAICS Code", "Small Business (by NAICS)", and "Emerging Small Business (by NAICS)". At the bottom left of the form are two buttons: "Search" and "Clear".

Figure 11-2: Vendor Codes – Address Level Vendor

The screenshot shows a user interface for managing vendor codes. On the left, there is a section titled "Do Not Pay Information" with fields for "Do Not Pay:" (checkbox checked) and "Match Date". Below these are "Match Source:" and "Description:" fields. A dropdown menu for "Match Source:" is open, listing various sources like CCR, DBCK, DMF, EPLS, EPLS-PUB, LEIE, and Other. To the right of the dropdown are "Match Type:" and "Match Level:" fields, each with its own dropdown menu. The "Match Level:" dropdown is open, showing options: Conclusive, Probable, Possible, and Other. Another dropdown menu is visible on the far right, listing DUNS Match, Full Name Match, DUNS not in CCR, TIN + DBA Name Match, TIN + LAST Name Match, TIN + NAME Match, TIN Match, TIN not in CCR, and Other.

Match Source:		Match Type:	Match Level:	Other Options:			
CCR - Central Contractor Registration	DBCK - TOP Debt Check	DMF - SSA Death Master File	EPLS - Excluded Parties List (Private)	EPLS-PUB - Excluded Parties List (Public)	LEIE - List of Excluded Individuals and Entities	Other	DUNS Match
							Full Name Match
							DUNS not in CCR
							TIN + DBA Name Match
							TIN + LAST Name Match
							TIN + NAME Match
							TIN Match
							TIN not in CCR
							Other

A Appendix A: Automated Disbursement Field Descriptions

A.1 Undisbursed Payment Query

The Undisbursed Payment Query displays undisbursed payments (including advances and holdback releases, but not advance offsets or holdbacks), outstanding credits, and previously disbursed payments, which were rescheduled as a result of a cancel for reissue or a rejected Treasury schedule. Users can search on many fields, including schedule date, disbursing office, disbursing model, schedule category, schedule type, vendor information, document type, document number, rescheduled information, and disbursement status. Users can access detailed payment information by highlighting the summary record and clicking the “Details” button. Users can view a history of the payment by clicking the “History” button. The Certification History screen displays when payments are approved, disapproved, held, released, rescheduled and the User ID associated with these actions. Undisbursed payment records are grouped and viewed based on their common attributes (Document Type, Document Number, Schedule Date, Disbursing Office, Vendor, etc.) so that users may *optionally* perform actions (Reschedule, Approve, Disapprove) on these undisbursed payment records as a “group”, rather than being required to apply actions to all individual lines of an undisbursed payment document that share the same attributes. As payments are disbursed, they are removed from the query.

A.1.1 Undisbursed Payments Query Field Descriptions

Field Name	Description
Schedule Date	The date on which the payment must be selected by the disbursements process in order to be disbursed on time. It is updated by Payment Authorization, Schedule posting, Treasury reconciliation process (rejected schedules), and disbursement cancellation transaction (cancels for reissue).
Disbursing Office	The disbursing office responsible for the payment. It is updated by Payment Authorization.
Disbursing Model	Indicates whether the payment is being disbursed by Treasury or an agency printed check. For GSA, this will always be Treasury Disbursing. It is updated by Payment Authorization.
Schedule Category	The category of the schedule on which the payment was originally submitted (Treasury Disbursed Check, ACH (CCD+/PPD+) or ACH (CTX). It is updated by Payment Authorization.
Schedule Type	The type of schedule on which the payment was originally submitted (Corporate or Personal). It is updated by Payment Authorization.
Security Organization	The established security organization for the payment.
Vendor Code	The vendor associated with the payment. It is updated by Payment Authorization.
Vendor Address Code	The code representing the address of the vendor. It is updated by Payment Authorization.
Vendor Name	The name of the vendor or employee receiving the payment. It is updated by Payment Authorization.
Document Type	The document type used to authorize the payment. It is updated by Payment Authorization.
Document Number	The document number used to authorize the payment. It is updated by Payment Authorization.
Item Line Number	The itemized line number of the Payment Authorization document.
Accounting Line Number	The accounting line number of the Payment Authorization document.
Approved (drop-down box)	Indicates that the disbursement has been approved and is ready to be picked up by the disbursements process on the indicated schedule date. Updated by the Schedule Posting process or on the Disbursing Information Page of the payment transaction. Also may be updated by clicking on the Approve or Unapprove button on the Undisbursed Payments Query.
Rescheduled (drop-down box)	Indicates that the payment has been rescheduled due to errors in the schedule posting process. Updated by the Schedule posting process.
ECS/SPS (drop-down box)	Indicates if the payment was disbursed using to the Electronic Certification System (ECS)
Disbursement In Progress (drop-down box)	Indicates that a payment has been selected and is in the process of being disbursed. It is updated by the Payment Selection process.
Group Payments (drop-down box)	Indicates whether the payment is eligible for grouping with other payments to the same vendor. It is updated by Payment Authorization.
Manual Check (drop-down)	Indicates whether payments will be disbursed on a manual check. For GSA, this will always be unchecked. It is updated by Payment Authorization.

Field Name	Description
Revaluation Required (drop-down box)	Indicates whether revaluation is required for the payment.
Insufficient Funds (drop-down box)	Indicates whether the cash account associated with the payment's Treasury Symbol has been overdrawn. Updated by Insufficient Funds report.
Total Amount	The net total of the payment amount and the credit amount for the payment transaction. It is updated by Payment Authorization.
Credit Amount	The total amount of all credit lines on the payment transaction. It is updated by Payment Authorization.
Payment Amount	The amount of the payment to be disbursed. It is updated by Payment Authorization.
Rescheduling Information (section)	
New Schedule Date	The new date on which the payment will be selected by the disbursements process. It is updated by direct entry to the Undisbursed Payments query.
Early Payment Approval (drop-down box)	If the entered new schedule date is more than eight days before the prompt pay schedule date, this field indicates whether or not the early payment has been approved. Used for prompt pay reporting purposes. It is updated by direct entry to the Undisbursed Payments query.
Interest Reason Code	A code identifying the reason why the payment will incur an interest penalty if rescheduling will cause the payment to be late. It is updated by direct entry to the Undisbursed Payments query.
Discount Lost Reason Code	A code identifying why an available discount was lost if rescheduling will cause an available discount to be lost. It is updated by direct entry to the Undisbursed Payments query.
Reschedule (button)	If a New Schedule Date is entered, the Reschedule button is enabled and must be pressed to update the Undisbursed Payments query with the new schedule date.
Approve (button)	If the Disbursement Approval checkbox is not checked, this button must be pressed to approve the payment for disbursement.
Disapprove (button)	If the Disbursement Approval checkbox is checked, this button must be pressed to unapprove the payment and hold it from disbursement.
View Document (button)	Displays the Payment Authorization document.
Release/Hold (button)	Releases or Holds the payment.
History	Displays the certification history of the payment.

A.2 Schedule Query

A successful run of the automated disbursements process results in the generation of Treasury schedules. The Schedule query displays summary schedule information for each generated schedule, such as date submitted, number of payments, and total vouchered amount. Users can search on many fields, including schedule category and type, disbursing office, schedule action,

and confirm/reject date. Users can access schedule detail information by highlighting the schedule record and clicking the “Details” button.

The Schedule query also reflects the most recent activity recorded for the schedule. For example, when users enter Treasury’s confirmation or rejection of the schedule, the resulting schedule status, confirmed/rejected date, and confirmed/rejected amount are displayed on the query.

Figure A-2: Schedule Query Detail page

The screenshot displays the 'Schedule Query Detail' page with three main sections:

- Schedule Information:** Contains fields for FY (2011), Schedule Category (ACH (CCD+/PPD+)), Disbursing Office (E2), Manual (Yes), Vouchered Amount (\$40.00), Payment Category (VENDOR), Posted by Treasury/FRB (Posted), Disbursing Model (Treasury Disbursing), Line Code (Vendor), Schedule Type (Personal), Partition, Vouchered Transaction Amount (\$40.00), Schedule Number (GS11D001), Transaction Currency (USD), Total Number of Payments (1), Number of Confirmed Payments (1), Fully Expended (checked), and Details Posted (checked).
- Output File:** Submission Date (10/23/2010), View Output button, and Output File Name field.
- Confirmed Information:** Detail Level Confirmation/Rejection (checkbox), Confirmed/Rejected Amount (\$40.00), and Pre-printed Number field.

A.2.1 Schedule Query Detail Field Descriptions

Field Name	Description
Schedule Category	Identifies the schedule as one of the following: Treasury disbursed check, ACH (CCD+/PPD+), or ACH (CTX). It is updated by the schedule posting process, Payment transactions entered with a manual schedule number, Manual additions to the Change Schedule Information entry window.
Disbursing Model	Indicates whether the payment is being disbursed by Treasury or an agency printed check. For GSA, this will always be Treasury Disbursing. It is updated by Payment Authorization.
Schedule Type	Identifies the type of payments included on the schedule (i.e., corporate, personal). It is updated by the schedule posting process, Payment transactions entered with a manual schedule number, Manual additions to the Change Schedule Information entry window.
Schedule Number	The number assigned to the schedule by GSA. It is updated by the schedule posting process, Payment transactions entered with a manual schedule number, Manual additions to the Change Schedule Information entry window.

Field Name	Description
Confirmed/Rejected Date	The date on which Treasury confirmed or rejected the schedule. It is updated by manual updates or additions to the Change Schedule Information entry window, the Treasury reconciliation process (backed out schedules only).
Accounting Period	The accounting period to which the schedule is posted. It is updated by the Treasury reconciliation process.
Disbursing Office	The disbursing office responsible for disbursing the payments on the schedule. It is updated by the schedule posting process, Payment transactions entered with a manual schedule number, Manual additions to the Change Schedule Information entry window.
Payment Category	The type of vendor being paid. Determines whether or not the payment is subject to Treasury Offsets and as a result, defaults to Vendor. Other valid value is Miscellaneous.
Line Code	Indicated whether the code is Vendor or Miscellaneous.
Schedule Action	If the Posted by Treasury check box is false, this field represents the action which Pegasys should perform the next time you run the Treasury reconciliation process (i.e., no action, confirm, reject, in progress or complete). If the Posted by Treasury check box is true, this field represents the current status of the schedule. It is updated by the schedule posting process, Payment transactions entered with a manual schedule number, Manual additions to the Change Schedule Information entry window, the Treasury reconciliation process (backed out schedules).
Posted by Treasury/FRB (drop-down box)	Indicates whether Treasury's confirmation or rejection of the schedule has been posted by the Treasury reconciliation process. It is updated by the Treasury reconciliation process.
Vouchered Transaction Amount	The total amount of the payment transactions assigned to the schedule. It is updated by the schedule posting process, Payment transactions entered with a manual schedule number.
Details Posted (check box)	For manual schedules, indicates whether any of the supporting payment authorizations have been posted by the Treasury reconciliation process. It is updated by the Treasury reconciliation process.
Fully Expended (check box)	For manual schedules, indicates whether all of the supporting payment authorizations have been posted by the Treasury reconciliation process. It is updated by the Treasury reconciliation process.
Total Number of Payments	The total number of payments assigned to the schedule. It is updated by Schedule posting process, Payment transactions entered with a manual schedule number.
Number of Confirmed Payments	The number of confirmed payments on the schedule. System-maintained based on the schedule line action on the schedule detail records.
Pre-printed Number	The pre-printed number assigned to the schedule by Treasury. It is updated by manual updates or additions to the Change Schedule Information entry window.
Output File	
Submission Date	The date the schedule was submitted to Treasury. It is updated by the schedule posting process, Payment transactions entered with a manual schedule number, Manual additions to the Change Schedule Information entry window.

Field Name	Description
Output File Name	The Output File Name.
Confirmed Information (section)	
Detail Level Confirmation / Rejection (check box)	Indicates whether the user confirms/rejects payments as a whole or at the line-level. If true, only confirm/reject date, accounting period, and action are entered at the header level; all other information is entered for each schedule detail. Otherwise all of the information is entered on the summary level.
Schedule Action (drop-down box)	The new action associated with the schedule (i.e., no action, confirm, reject, in progress or complete) based on Treasury's results.
Confirmed / Rejected Amount	The amount of the schedule that has been confirmed or rejected by Treasury. It is updated by manual updates or additions to the Change Schedule Information entry window, the Treasury reconciliation process (backed out schedules only).
Confirmed / Rejected Date	The date on which Treasury confirmed or rejected the schedule.
Accounting Period	The accounting period to which the schedule is posted.
Backout Requested (drop-down box)	For confirmed schedules, indicates whether you have requested that Pegasys back out the confirmation the next time you run the Treasury reconciliation process. Set to true by manual update to the Update Schedule Information section. Reset to false by the Treasury reconciliation process when backout is accomplished.
Pre-printed Number	The pre-printed number assigned to the schedule by Treasury.
Check Symbol	The check symbol associated with this disbursing office. It is updated by manual updates or additions to the Change Schedule Information entry window, the Treasury reconciliation process (backed out schedules only).
Confirmed / Rejected Transaction Amount	The amount of the schedule transactions that have been confirmed or rejected by Treasury. It is updated by manual updates or additions to the Change Schedule Information entry window, the Treasury reconciliation process (backed out schedules only).
Beginning Check/Trace Number	The check number or EFT trace number assigned to the first payment on the schedule. It is updated by manual updates or additions to the Change Schedule Information entry window, the Treasury reconciliation process (backed out schedules only).
Ending Check/Trace Number	The check or EFT trace number assigned to the last payment on the schedule. It is updated by manual updates or additions to the Change Schedule Information entry window, the Treasury reconciliation process (backed out schedules only).
Save (button)	After new information is added to the Update Schedule Information section, press Save to update the schedule.
Details (tab)	Displays schedule detail information. Highlight the vendor record and click the Schedule Detail hyperlink.

Field Name	Description
Schedule Information (section)	
FY	The fiscal year associated with the schedule. It is updated by the schedule posting process, Payment transactions entered with a manual schedule number, Manual additions to the Change Schedule Information entry window.
Type	Identifies the type of payments included on the schedule (i.e., corporate, personal). It is updated by the schedule posting process, Payment transactions entered with a manual schedule number, Manual additions to the Change Schedule Information entry window.
Category	Identifies the schedule as one of the following: Treasury disbursed check, ACH (CCD+/PPD+), or ACH (CTX). It is updated by the schedule posting process, Payment transactions entered with a manual schedule number, Manual additions to the Change Schedule Information entry window.
Disbursing Model	Indicates whether the payment is being disbursed by Treasury or an agency printed check. For GSA, this will always be Treasury Disbursing. It is updated by Payment Authorization.

Field Name	Description
Number	The number assigned to the schedule by your agency. It is updated by the schedule posting process, Payment transactions entered with a manual schedule number, Manual additions to the Change Schedule Information entry window.
General (section)	
Disbursing Office	The disbursing office responsible for disbursing the payments on the schedule. It is updated by the schedule posting process, Payment transactions entered with a manual schedule number, Manual additions to the Change Schedule Information entry window.
Sequence	The number that identifies the sequence of each payment within the schedule; used to assign the proper check number or EFT trace number to each payment. It is updated by the schedule posting process, Payment transactions entered with a manual schedule number.
Check Symbol	The check symbol associated with the disbursing office. It is updated by the schedule posting process.
Check/Trace Number	The check number or EFT trace number assigned to the payment by Treasury. It is updated by the Treasury reconciliation process.
Action	The action associated with the schedule (i.e., no action, confirm, reject, in progress or complete) based on Treasury's results.
Paid By Check (check box)	Indicates schedule has been paid by agency-disbursed check.
Posted By Treasury / FRB (check box)	Indicates whether Treasury's confirmation or rejection of the schedule has been posted by the Treasury reconciliation process. It is updated by the Treasury reconciliation process.
Manual (check box)	Indicates whether this schedule is a manual schedule. It is updated by payment transactions with the manual schedule check box set to true.
Total Amount	The total amount associated with each schedule line. It is updated by the schedule posting process, Payment transactions entered with a manual schedule number.
Transaction Confirmed Rejected Amount	The amount of the transaction that has been confirmed or rejected.
System Confirmed Rejected Amount	The amount of the schedule that has been confirmed or rejected by the system. Updated by manual updates or additions to the Treasury Schedule Control entry page, and the Treasury reconciliation process (backed out schedules only).
Vendor (group box)	
Code	The code representing the vendor or employee receiving the payment. It is updated by the schedule posting process, Payment transactions entered with a manual schedule number.
Address Code	The code representing the address of the vendor. It is updated by the schedule posting process, Payment transactions entered with a manual schedule number.

Field Name	Description
Name	The name of the vendor or employee receiving the payment. It is updated by the schedule posting process, Payment transactions entered with a manual schedule number.
Sublines (tab)	Displays the Payment Authorization document information associated with each payment on the schedule. Highlight the payment record and click the Details hyperlink.

Figure A-4: Sublines page

The screenshot shows a software interface titled "Schedule Query Detail | Details". Below the title, there are two tabs: "Schedule Detail" and "Sublines", with "Sublines" being the active tab. Under the "Sublines" tab, the word "Details" is displayed. At the top of the main area, there are buttons for "Display" (set to 10 items), "View as CSV", and "Sort...". Below these buttons is a table with four columns: "Document Type", "Document Number", "Item Line #", and "Acctng Line #". The table contains two rows of data:

Document Type	Document Number	Item Line #	Acctng Line #
PM	PM20101023000001	0	1
PM	PM20101023000001	0	2

Field Name	Description

A.4.1 Check Summary Query Field Descriptions

Field Name	Description
General (section)	
Disbursing Office	The disbursing office that issued the check. It is updated by the Treasury reconciliation process.
Check /Trace Number	The number that identifies the check. It is updated by the Treasury reconciliation process.
Payment Date	The date the check was printed. It is updated by the Treasury reconciliation process.
Cancel Type (drop-down box)	Indicates whether the check has been canceled, and if so, the type of cancel (i.e., replacement, reissue, or deletion). It is updated by Disbursement Cancellation transactions.
Bank ABA/BIC	The code identifying the payer's bank. It is updated by the Treasury reconciliation process.
Check Symbol	The check symbol associated with this disbursing office. It is updated by the Treasury reconciliation process.
Check FY	The fiscal year the check was printed. It is updated by the Treasury reconciliation process.
Payment Amount	The amount of the check. It is updated by the Treasury reconciliation process.
Security Org	The Security Organization of the check.
Manual Check (check box)	Indicates whether the check was written manually. For GSA, this will always be false.
Schedule Information (section)	
Schedule FY	The fiscal year of the schedule on which the check was submitted to Treasury. It is updated by the Treasury reconciliation process
Schedule Category	The category of schedule on which the check was submitted to Treasury; (i.e. Treasury Disbursed Check, ACH (CCD+PPD+), or ACH (CTX)). It is updated by the Treasury reconciliation process.
Schedule Type	The type of schedule on which the check was submitted to Treasury; ((i.e. Corporate or Personal)). It is updated by the Treasury reconciliation process.
Schedule Number	The number of the schedule on which the check was submitted to Treasury. It is updated by the Treasury reconciliation process.
Vendor (section)	
Vendor Code and Vendor Address Code	The code that represents the vendor or employee receiving the check. It is updated by the Treasury reconciliation process.
Vendor Name	The name of the payee receiving the check. It is updated by the Treasury reconciliation process.
More (button)	Provides vendor address information on the Vendor Details page.
Offset Amount (section)	
Offset Amount	Records the dollar amount of offset. It is updated by direct entry.

Field Name	Description
Offset Information	Text field used to provide a description of the offset. It is updated by direct entry.
Check Query Detail (tab)	Displays payment detail information after highlighting the appropriate check payment record.

A.4.2 Check Detail Query Field Descriptions

Figure A-8: Check Query Details page

The screenshot shows a web-based application interface for viewing check query details. At the top, there are two tabs: "Check Query Summary" and "Check Query Details". The "Check Query Details" tab is active and highlighted in blue. Below the tabs, there is a toolbar with buttons for "View Document", "Display 10 Items", "View as CSV", and "Sort...".

Below the toolbar, a table displays document details:

	Document Type	Document Number
	PM	PM20101020000015

Below the table are links for "Expand All" and "Collapse All".

The main content area contains a form with various input fields and dropdown menus. The "General" section includes fields for Disbursing Office (E2), Record Type (Principal), Check Symbol (310), Currency (USD), Trace Number (00000003), Record Amount (\$20.00), Payment Fiscal Year (2011), Vendor Name (MISC VENDOR FOR TR), and Document Type (PM). There is also a section for "Document Number" with a dropdown menu showing "PM20101020000015".

Field Name	Description
Disbursing Office	The disbursing office that issued the check. It is updated by the Treasury reconciliation process.

Field Name	Description
Check Symbol	The check symbol associated with this disbursing office. It is updated by the Treasury reconciliation process.
Trace Number	The number that identifies the check. It is updated by the Treasury reconciliation process.
Payment Fiscal Year	The fiscal year the check was printed. It is updated by the Treasury reconciliation process.
Vendor Name	The name of the payee receiving the check. It is updated by the Treasury reconciliation process.
Document Type	The Payment Authorization document type associated with the payment. It is updated by the Treasury reconciliation process.
Document Number	The Payment Authorization document number assigned to the payment. It is updated by the Treasury reconciliation process.
Item Line #	The itemized line number of the Payment Authorization document. It is updated by the Treasury reconciliation process.
Actg Line #	The accounting line number of the Payment Authorization document. It is updated by the Treasury reconciliation process.
Record Type	The record type associated with the payment line (i.e., principal, credit, interest, penalty, discount, etc.) It is updated by the Treasury reconciliation process.
Record Amount	The dollar amount associated with the record type. It is updated by the Treasury reconciliation process.

A.4.3 Check Vendor Details Field Descriptions

Figure A-9: Vendor Details page

Vendor Address

Code:	RELO	00001
Standardized Format:	Yes <input type="button" value="▼"/>

Field Name	Description
Vendor Code and Vendor Address Code	The code that represents the vendor or employee receiving the check. It is updated by the Treasury reconciliation process.
Standardized Format	Determines if the payee's street address is the Standard US Format. If an address type of Non US is selected, up to 5 lines of 33 characters each may be entered to indicate the payee's address.
Address Active Status	Determines if the Vendor is Active.
Vendor Address Type	The type of address for the vendor.
Name	The name of the payee receiving the check. It is updated by the Treasury reconciliation process.
Address	The street address of the vendor or employee receiving the check. It is updated by the Treasury reconciliation process.

Field Name	Description
City	The city of the vendor or employee receiving the check. It is updated by the Treasury reconciliation process.
State	The state of the vendor or employee receiving the check. It is updated by the Treasury reconciliation process.
Zip Code	The zip code of the vendor or employee receiving the check. It is updated by the Treasury reconciliation process.
County	The county of the vendor or employee receiving the check. It is updated by the Treasury reconciliation process..
Country	The country of the vendor or employee receiving the check. It is updated by the Treasury reconciliation process.
Phone	The phone of the vendor or employee receiving the check. It is updated by the Treasury reconciliation process.
Fax	The fax of the vendor or employee receiving the check. It is updated by the Treasury reconciliation process.
Email	The email address of the vendor or employee receiving the check. It is updated by the Treasury reconciliation process.
Contact	The contact person of the vendor or employee receiving the check. It is updated by the Treasury reconciliation process.
Title	The title of the contact person of the vendor or employee receiving the check. It is updated by the Treasury reconciliation process.
DUNS	The DUNS for the vendor.
DUNS + 4	The DUNS+4 for the vendor.
CCRC Enabled	Determines if the vendor is CCRC enabled.
VSS Enabled	Determines if the vendor is VSS enabled
Currency Code	The currency code associated with the vendor.

Field Name	Description
Disbursement Details (section)	
Cancel Number	The Treasury Cancel Number of the canceled payment. It is updated by Disbursements Cancellation document or direct entry.
Cancel Confirm Date	The confirmation date of the canceled payment. It is updated by Disbursements Cancellation document, Direct entry.
Accounting Period	The accounting period to which the cancellation is posted. It is updated by Disbursements Cancellation document, Direct entry.
Security Org	The security organization of the canceled payment.
Fiscal Year	The fiscal year the payment was made. It is updated by the Treasury reconciliation process.
Check/Trace Number	The check number or EFT trace number assigned to the payment by Treasury. It is updated by the Treasury reconciliation process.
Check Symbol	The check symbol associated with this disbursing office. It is updated by the Treasury reconciliation process.
Check/Payment Date	The date the payment was made. It is updated by the Treasury reconciliation process.
Schedule Details (section)	
Schedule Category	The category of schedule on which the payment was submitted to Treasury; (i.e. Treasury Disbursed Check, ACH (CCD+/PPD+), or ACH (CTX)). It is updated by the Treasury reconciliation process.
Schedule Type	The type of schedule on which the payment was submitted to Treasury; (i.e. Corporate or Personal). It is updated by the Treasury reconciliation process.
Schedule Number	The number of the schedule on which the payment was submitted to Treasury. It is updated by the Treasury reconciliation process.
Document Information (section)	
Doc Type	The document type used to cancel the payment (i.e., N6 or N7). It is updated by Disbursements Cancellation document.
Document Number	The document number used to cancel the payment (i.e., N6 or N7). It is updated by Disbursements Cancellation document.
Line Number	The line number used to cancel the payment. It is updated by Disbursements Cancellation document.
Payment Amount	The amount of the payment being canceled. It is updated by Disbursements Cancellation document.
Vendor (section)	
Vendor Code and Vendor Address Code	The code representing the vendor or employee. It is updated by Disbursements Cancellation document.
Name	The name of the vendor or employee.

Field Name	Description
Save (button)	Saves the entered cancellation confirmation information.
View Document (button)	Displays the payment document.

A.5.2 Disbursement Cancellation Form Field Descriptions

Figure A-11: Disbursement Cancellation Header Page

The screenshot shows a software interface for a 'Disbursement Cancellation' form. At the top, there's a navigation bar with tabs: Header (selected), Accounting Lines, Approval Routing, Memos, Summary, Correspondence, References..., Workflow Status, and Approval History. Below the navigation is a button for 'Expand All' or 'Collapse All' sections.

Amounts Section:

- Cancellation Amount: \$0.00

[Return to Top](#)

Field Name	Description
General (section)	
Document Type	The type of document as defined in the Document Type Maintenance table.
Status	The status of the cancellation form or document (e.g., New). This field is read-only.
Document Number	The document number for the form or document.
Title	The title of the form. Can be up to 30 characters in length. Defaults to the value entered when creating the form.
Cancelled By	The person authorizing the disbursement cancellation.

Field Name	Description
Cancellation Total	System Maintained. The sum of all line amounts.
Cancel Date	The date the disbursement cancellation was entered. If no date is entered, Pegasys will default this value to the current date. Please enter the value in the following format: MM/DD/YY or MM/DD/YYYY.
Accounting Period	The accounting period the document will affect. It must be valid in the Accounting Period Maintenance table. If no value is entered, Pegasys will default this value to the accounting period associated with the date entered or defaulted to. Please enter the value in the following format: MM/YYYY. Right mouse list available.
Reporting Accounting Period	The accounting period that will be used for accounting purposes. It must be valid in the Accounting Period Maintenance table. If no value is entered, Pegasys will default this value to the accounting period associated with the date entered or defaulted to. Please enter the value in the following format: MM/YYYY. Right mouse list available.
Last Batch Number	The batch number assigned to the disbursement cancellation.
Document Classification	A client-defined classification, which identifies a particular type of disbursement cancellation.
Security Org	System maintained. The established Security Organization for the form. Only users specified in the Security Organization will have access to this form. Displays the value entered when creating the form or the user's default Security Organization.
Suppress Printing (checkbox)	Indicates that this form should not be printed from Pegasys.
Amounts (section)	
Cancellation Amount	The total cancellation amount.
External System Information (section)	
System ID	The external system identifier.
Description (section)	
Description	A free text field used to enter a description of the cancellation.
Extended Description	A free text field used to enter an extended description of the cancellation that may contain up to 60K characters in length.

Field Name	Description
General (section)	
Line Number	The number of the line currently displayed.
Disbursing Office	The disbursing office code, which identifies the disbursing office responsible for the disbursement being canceled.
Check Symbol	The check symbol assigned to this disbursing office code.
Check/Trace Number	The check number or EFT trace number of the disbursement being canceled.
Check/Payment Date	The date the check was printed or the electronic funds transfer occurred.
Cancel Type	Indicates whether you are canceling the disbursement for replacement, reissue, or deletion.
Bank CodeABA/BIC	The code of the bank responsible for the disbursement.

Field Name	Description
Available (drop-down box)	Indicates whether the cancellation is available (SF-1098) or unavailable (SF- 1184).
Re-open (check box)	Indicates whether a cancel for deletion should re-open the receipt/order and invoice referenced by the canceled payment.
Transfer Agency (group box)	
Treasury Symbol	Indicates the particular Treasury Symbol with whom the agency is conducting the transaction. This Treasury Symbol will be used for TIER and FACTS II external reports when external reporting is done out of Pegasys. The agency and bureau codes can be inferred from this information.
To/From	Indicates whether the payment is made to or from the specified Treasury Symbol. Only enabled if the vendor has a reporting attribute of Government.
Treasury Schedule Information (group box)	
Category	The category of the schedule on which this disbursement will be submitted to Treasury.
Type	Identifies the schedule type of the payment. Valid options are Corporate or Personal.
Number	Identifies the schedule number to which the payment type is assigned.
Bank Account Fault	Indicates a bank account fault.
Cancel Information (group box)	
New Schedule Date	For disbursements canceled for reissue, the schedule date which will be assigned to the corresponding payment authorization when it is restored to the Undisbursed Payments query.
Cancel Number	The cancel number assigned by Treasury.
Cancel Confirm Date	The date on which Treasury confirmed the cancellation.
Vendor Information (section)	
Vendor Code and Vendor Address Code	The code representing the vendor or employee.
Name	The name of the vendor or employee.
More (button)	Provides vendor address information on the Vendor Details page
Line Amounts (section)	
Amount	The amount disbursed, including principal, interest, penalty, and discounts.
Description (section)	
Description	A free text field used to enter a description of the cancellation.
Extended Description	A free text field used to enter an extended description of the cancellation that may contain up to 60K characters in length.

A.5.3 Disbursement Cancellation Vendor Details Field Descriptions

Figure A-13: Vendor Details page

The screenshot shows a form titled "Vendor Address". It contains the following fields:

- Code: Two input fields for code.
- Standardized Format: A dropdown menu set to "Yes".
- Address Active Status: A dropdown menu.
- Vendor Address Type: A dropdown menu.
- Name: One input field.
- Address: Five input fields for address lines.
- City: One input field.
- State: One input field.
- Postal Code: One input field.
- County: One input field.
- Country: One input field.
- Phone: One input field.
- Fax: One input field.
- Email: One input field.
- Contact: One input field.
- Title: One input field.
- DUNS: One input field.
- DUNS+4: One input field.
- CCR Enabled: A checkbox.
- VSS Vendor: A checkbox.
- Currency Code: One input field.

Field Name	Description
Vendor Code and Vendor Address Code	The code that represents the vendor or employee receiving the check. It is updated by the Treasury reconciliation process.
StandardizedFormat	Determines if the payee's street address is the Standard US Format. If an address type of Non US is selected, up to 5 lines of 33 characters each may be entered to indicate the payee's address.
Address Active Status	Determines if the Vendor is Active.
Vendor Address Type	The type of address for the vendor.

Field Name	Description
Name	The name of the payee receiving the check. It is updated by the Treasury reconciliation process.
Address	The street address of the vendor or employee receiving the check. It is updated by the Treasury reconciliation process.
City	The city of the vendor or employee receiving the check. It is updated by the Treasury reconciliation process.
State	The state of the vendor or employee receiving the check. It is updated by the Treasury reconciliation process.
Zip Code	The zip code of the vendor or employee receiving the check. It is updated by the Treasury reconciliation process.
County	The county of the vendor or employee receiving the check. It is updated by the Treasury reconciliation process..
Country	The country of the vendor or employee receiving the check. It is updated by the Treasury reconciliation process.
Phone	The phone of the vendor or employee receiving the check. It is updated by the Treasury reconciliation process.
Fax	The fax of the vendor or employee receiving the check. It is updated by the Treasury reconciliation process.
Email	The email address of the vendor or employee receiving the check. It is updated by the Treasury reconciliation process.
Contact	The contact person of the vendor or employee receiving the check. It is updated by the Treasury reconciliation process.
Title	The title of the contact person of the vendor or employee receiving the check. It is updated by the Treasury reconciliation process.
DUNS	The DUNS for the vendor.
DUNS + 4	The DUNS+4 for the vendor.
CCRC Enabled	Determines if the vendor is CCRC enabled.
VSS Enabled	Determines if the vendor is VSS enabled
Currency Code	The currency code associated with the vendor.

Agency Location Code	The Agency Location Code for which the data belongs. Represents the disbursing entity (agency, bureau, and accounting station) that accomplished the disbursement or collection.
Total Amount Paid	The total of the amount paid.
Total Interest Paid	The total dollar amount of the interest paid.
Percent Interest Paid	The percent of the interest paid.
Total Penalties Paid	The total dollar amount of the penalties paid.
Percent Penalties Paid	The percent of the penalties paid.

B Appendix B: Maintenance Table Settings

B.1 Disbursing Office Maintenance

The Disbursing Office Maintenance [**Figure B-1: Disbursing Office Maintenance Table**] table is a General System reference table used to define valid Treasury disbursing offices. GSA will establish disbursing office codes for the Kansas City and Austin Financial Centers. In addition, a disbursing office code 'TMR' and 'E2' will be established to facilitate separate runs of TMR and E2 disbursements during the day. Each disbursing office is associated with an Agency Location Code (ALC), which will be used to create the monthly SF-224.

B.1.1 Disbursing Office Codes (to be assigned to payments being disbursed)

Field	Description	Value	Value	Value	Value
Code	The disbursing office	KC6	AU7	TMR	E2

Field	Description	Value	Value	Value	Value
	code to be used on a payment.				
Name	The name of the disbursing office.	Kansas City Financial Center	Austin Financial Center	Kansas City Financial Center	Kansas City Financial Center
Short Name	The name for the disbursing office to be used on reports when there is not enough space for the full name.				
Status (drop-down box)	A flag that indicates if the code is currently being used.	Active	Active	Active	Active
Security Org	Restricts the use of the disbursing office to the users that belong to the selected Security Organization.	PEGASYS	PEGASYS	PEGASYS	PEGASYS
RFC	Indicates if the disbursing office is a regional financial center.				
Check Symbol	The check symbol that uniquely identifies the disbursing office.	310	220	310	310
Deposit Symbol	The Treasury assigned code that identifies the office collecting the deposit.				
Agency Location Code	The ALC associated with the disbursing office which will be used for the SF-224.	47000016	47000017	47000016	47000016
FRB Destination Bank ABA/BIC	The destination bank for the payment.				
FRB Originator Bank ABA/BIC	The originating bank for the payment.				
FRB Originator ID	A ten character text field for entering the ID of the originator.				
FRB Originator Description	A ten character text field for entering the description of the originator.				
Print Checks (check box)	Indicates whether the disbursing office prints its own checks.	False	False	False	False

Field	Description	Value	Value	Value	Value
Classified (check box)	Indicates if this disbursing office is a classified disbursing office.	False	False	False	False
Control Check Stock (check box)	Indicates whether you will use the Check Stock Maintenance table to control check stock. Only enabled if the Print Checks flag is set to true.	False	False	False	False
Enable Foreign Currency (check box)	Indicates if this disbursing office can be used with foreign currencies.	False	False	False	False
Restrict Currencies (check box)	Determines if currencies are restricted to specified currencies for the disbursing office. If checked, currencies to be accepted by the disbursing office for transactions may be specified on the Currencies tab.	False	False	False	False
DoS FSC (check box)	Indicates if this disbursing office is a Department of State Financial Service Center.	False	False	False	False
FRB Disbursing (check box)	Indicates if this disbursing office disbursed through the Federal Reserve Bank.	False	False	False	False
Effective Dates (group box)					
Start Date	The first date that this code is valid.				
End Date	The last date that this code is valid.				
Payment Line Amounts and Options (section)					
Accelerated Payment for Invoices Less Than Amount	The threshold amount for payments to be considered for the accelerated payment method (for example, Fast Pay). Payments less than this amount can potentially be eligible for accelerated payment.	\$0.00	\$0.00	\$0.00	\$0.00
Apply Partial Payments	Indicates whether the system should apply part of a payment.	True	True	True	True
Default Group Payments	Specifies the default setting that indicates whether the system should group payments to the same vendor with the same schedule date on a single check or	True	True	True	True

Field	Description	Value	Value	Value	Value
	EFT payment.				
Enable Grouping	Indicates whether the system should allow users to group payments to the same vendor with the same schedule date on a single check or EFT payment if Default Group Payments is set to false.	True	True	True	True
Infer ALC From Fund	If true, indicates that the agency will specify an agency location code for each fund code as part of the user Fund reference data. If false, indicates that the agency will specify an agency location code for each disbursing office as part of the user Disbursing Office reference data.	False	False	False	False
Maximum ACH CCD+ Amount	The maximum dollar amount for which the automated disbursements process generates a single ACH CCD+ payment. Automated disbursements will not select individual payments that exceed this amount, and will not group payments so that their total exceeds this amount.	\$999,999,999.99	\$999,999,999.99	\$999,999,999.99	\$999,999,999.99
Maximum ACH CTX Amount	The maximum dollar amount for which the automated disbursements process generates a single ACH CTX payment. Automated disbursements will not select individual payments that exceed this amount, and will not group payments so that their total exceeds this amount.	\$99,999,999.99	\$99,999,999.99	\$99,999,999.99	\$99,999,999.99
Maximum ACH PPD+ Amount	The maximum dollar amount for which the automated disbursements process generates a single ACH PPD+ payment. Automated disbursements will not select individual	\$999,999.99	\$999,999.99	\$999,999.99	\$999,999.99

Field	Description	Value	Value	Value	Value
	payments that exceed this amount, and will not group payments so that their total exceeds this amount.				
Maximum Check Amount	The maximum dollar amount for which the automated disbursements process generates a single check payment. Automated disbursements will not select individual payments that exceed this amount, and will not group payments so that their total exceeds this amount.	\$9,999,999.99	\$9,999,999.99	\$9,999,999.99	\$9,999,999.99
Maximum SDPR Amount	The maximum dollar amount for which the automated disbursements process generates a single SDPR payment. Automated disbursements will not select individual payments that exceed this amount, and will not group payments so that their total exceeds this amount.	\$0.00	\$0.00	\$0.00	\$0.00
Maximum TFCS Amount	The maximum payment amount for payments to be disbursed through TFCS.	\$999,999,999.99	\$999,999,999.99	\$999,999,999.99	\$999,999,999.99
Minimum SDPR Amount	The minimum payment amount for payments to be disbursed through SDPR.	\$0.00	\$0.00	\$0.00	\$0.00
Minimum TFCS Amount	The minimum payment amount for payments to be disbursed through TFCS.	\$1.00	\$1.00	\$1.00	\$1.00
Process EFT Payments	Indicates whether the agency disburses electronic funds transfer payments through Treasury.	True	True	True	True
System Currency	The system currency. Must be valid on the Currency Code maintenance table.	USD	USD	USD	USD
Take Credit if not Grouping	Indicates whether the system applies outstanding credits to single payments if the enable grouping	True	True	True	True

Field	Description	Value	Value	Value	Value
	indicator is false.				
Use CTX	If set to true, EFT payments may be eligible for using the Corporate Trade Exchange (CTX) format for disbursements, if that payment type is also available for the specific vendor.	False	False	False	False
Payment Lag Days (section)					
Agency Check	Payment Lags days between disbursing process and agency check distribution	0	0	0	0
Treasury Check	Payment lag days between disbursing process and treasury check distribution	2	2	2	2
ACH	Payment lag days between disbursing process and ACH distribution	2	2	2	2
TFCS	Payment lag days between disbursing process and TFCS distribution	0	0	0	0
Address (section)					
Standardized Format		Yes	Yes	Yes	Yes
Address Line 1	The first address line for the disbursing office.	PO Box 12599-0599	PO Box 149058	PO Box 12599-0599	PO Box 12599-0599
Address Line 2	The second address line for the disbursing office.				
Address Line 3	The third address line for the disbursing office.				
City	The city where this disbursing office is located.	Kansas City	Austin	Kansas City	Kansas City
State	The state where this disbursing office is located.	MO	TX	MO	MO
Zip Code	The postal zip code for this disbursing office's address.	64116-0599	78714-9058	64116-0599	64116-0599
County	The county where this disbursing office is located.				
Country	The country where this disbursing office is located.	US	US	US	US
Phone	The phone number of the disbursing office.	(816) 414-2100	(512) 342-7300	(816) 414-2100	(816) 414-2100
Fax	The fax number of the disbursing office.	(816) 414-2111	(512) 342-7228	(816) 414-2111	(816) 414-2111

Field	Description	Value	Value	Value	Value
Email	The internet address of the disbursing office.				
Contact	The contact person for the disbursing office.				
Title	The title of the contact person for the disbursing office.				
Description (section)					
Description	A free text field used to enter additional information about the disbursing office.	Region 6 payments disbursed via Kansas City Financial Center	Region 7 payments disbursed via Austin Financial Center	TMR payments disbursed via Kansas City Financial Center	E2 payments disbursed via Kansas City Financial Center

B.1.2 Former (“Dummy”) Codes (no longer assigned to non-disbursed payments)

Field	Description	Value	Value	Value
Code	The disbursing office code to be used on a payment.	KCMO	AUTX	WADC
Name	The name of the disbursing office.	KC, MO Disbursing Office	AUSTIN, TX Disbursing Office	Washington DC Disbursing Office
Short Name	The name for the disbursing office to be used on reports when there is not enough space for the full name.			
Status (drop-down box)	A flag that indicates if the code is currently being used.	Inactive	Inactive	Active
Security Org	Restricts the use of the disbursing office to the users that belong to the selected Security Organization.	PEGASYS	PEGASYS	PEGASYS
RFC	Indicates if the disbursing office is a regional financial center.			

Field	Description	Value	Value	Value
Check Symbol	The check symbol that uniquely identifies the disbursing office.			
Deposit Symbol	The Treasury assigned code that identifies the office collecting the deposit.			
Agency Location Code	The ALC associated with the disbursing office which will be used for the SF-224.	47000016	47000017	47000001
FRB Destination Bank	The destination bank for the payment.			
FRB Originator Bank	The originating bank for the payment.			
FRB Originator ID	A ten character text field for entering the ID of the originator.			
FRB Originator Description	A ten character text field for entering the description of the originator.			
FRB Disbursing (check box)	Indicates if this disbursing office disbursed through the Federal Reserve Bank.	False	False	False
Restrict Currencies (check box)	Determines if currencies are restricted to specified currencies for the disbursing office. If checked, currencies to be accepted by the disbursing office for transactions may be specified on the Currencies tab.	False	False	False
DoS FSC (check box)	Indicates if this disbursing office is a Department of State Financial Service Center.	False	False	False
Print Checks (check box)	Indicates whether the disbursing office prints its own checks.	False	False	False

Field	Description	Value	Value	Value
Classified (check box)	Indicates if this disbursing office is a classified disbursing office.	False	False	False
Control Check Stock (check box)	Indicates whether you will use the Check Stock Maintenance table to control check stock. Only enabled if the Print Checks flag is set to true.	False	False	False
Enable Foreign Currency (check box)	Indicates if this disbursing office can be used with foreign currencies.	False	False	False
Effective Dates (group box)				
Start Date	The first date that this code is valid.			
End Date	The last date that this code is valid.			
Address (section)				
Standardized Format		Yes	Yes	Yes
Address Line 1	The first address line for the disbursing office.			
Address Line 2	The second address line for the disbursing office.			
Address Line 3	The third address line for the disbursing office.			
City	The city where this disbursing office is located.			
State	The state where this disbursing office is located.			
Zip Code	The postal zip code for this disbursing office's address.			
County	The county where this disbursing office is located.			
Country	The country where this disbursing office is located.			

Field	Description	Value	Value	Value
Phone	The phone number of the disbursing office.			
Fax	The fax number of the disbursing office.			
Email	The email address of the disbursing office.			
Contact	The contact person for the disbursing office.			
Title	The title of the contact person for the disbursing office.			
Description (section)				
Description	A free text field used to enter additional information about the disbursing office.			

B.2 Default Payment Text Codes

The Default Payment Text maintenance table [**B-2: Default Payment Text Codes**] is used to define and store standard text to be printed on checks. The user may define a different standard text clause for each payment document type.

Figure B-2: Default Payment Text Codes

Status	Determines whether the code is active or inactive.	Active	Active
Standard Text	Up to 40 characters of text printed on a check when no other text is specified.		

B.3 Discount Lost Reasons

The Discount Lost Reason Maintenance [Figure B-3: Discount Lost Reason Table] table provides valid codes used to identify reasons why a discount was not taken on a given disbursement. The discount lost reason is specified in three Pegasys situations:

- When the PA determines that it will lose a discount.
- When the Automated Disbursements process determines that a payment will lose a discount.
- When the Automated Disbursements process determines that it is not economically justifiable to take a discount.

B.5 Interest, Penalty, and Discount Distributions

The payment selection process in Pegasys assigns accounting distributions to interest, penalty, and discount lines based on options defined in the Interest, Penalty, and Discount Distributions Maintenance table [*Figure B-5: Interest, Penalty and Discount Distributions Table*]. On this table, GSA will determine for each fund whether interest, penalties, and discounts will be charged to the same accounting distribution as the payment principal line, or whether to use substitute values for some or all of the accounting dimensions on the principal line. This table will also determine the transaction type for general ledger postings.

Note: Data Entry Rule

For all accounting dimensions' Data Entry Rule: Indicates whether the record should use the accounting dimension code from the Principal line (P), the value entered on this table (UEV), or should not use that accounting dimension (DNU) to post interest, penalty, or discounts.

Note: Derived Values

For all accounting dimensions' Derived Value: Indicates the accounting dimension code to be used for posting interest, penalty, or discounts if that accounting dimension's Data Entry Rule is set to Use Entered Value.

B.6 Payment Types

The Payment Types Maintenance [*Figure B-6: Payment Types Maintenance Table*] table defines the valid types of payments accepted by each vendor and bank. Each payment type is assigned to a unique system-defined schedule category, such as Treasury Disbursed Check or ACH (CCD+/PPD+). Payment types are entered on PA documents (or defaulted from the vendor address) to determine the type of schedule on which the payment will appear. The following table provides the payment types that will be used by GSA.

B.7 Payment Options

The Payment Options Maintenance table [Figure B-7: Payment Options Maintenance Table] provides disbursing options and defaults that are used by the automated disbursements offline processes. A payment option will be established for each fiscal year.

Figure B-7: Payment Options Maintenance Table

The screenshot shows a web-based configuration tool for payment options. At the top, a blue header bar contains the word 'Options'. Below it is a toolbar with 'Expand All' and 'Collapse All' buttons. The main area is divided into two sections:

- General:** This section contains several input fields with validation symbols (*):
 - Fiscal Year: 2009
 - Disbursing Office: KC6
 - System Currency: USD
 - Classified Disbursing Office: (empty)
 - Prompt Pay Type: STD
 - Minimum Number of Payments: 1
 - Current Value of Funds Rate: 5
 - Summary Posting Doc Type: (empty)
 - Summary Posting Transaction Type: 01
 A summary row at the bottom shows BBFY: 2002, EBFY: (empty), and Fund: 206X.
- Reason Codes:** This section contains pairs of input fields for interest and discount reason codes:
 - Interest Reason Code (Docs): 02, Discount Lost Reason Code (Docs): 02
 - * Interest Reason Code (AD): 02, * Discount Lost Reason Code (AD): 02
 - Invoice Interest Reason Code: 02, * Discount Lost Reason Code (NE): 01
 - Receipt Interest Reason Code: 01

At the bottom left of the form area, there is a link 'Go to top of page'.

Field	Description	Value
General (section)		
Fiscal Year	Fiscal year to be used for payment option	Current
Disbursing Office	Disbursing office used as the default on payment transactions	KC6
Classified Disbursing Office	The classified disbursing office to be used for payments to be used when making classified payments.	
Prompt Pay Type	Type of prompt pay to be used	STD
Minimum Number of Payments	Minimum number of payments included on a schedule	1
Current Value of Funds Rate	Rate defined by Treasury to determine whether discounts are economically justifiable	1

Field	Description	Value
Summary Posting Doc Type	Doc type to be used by Treasury Rec. when confirming a summary-level manual schedule	
Summary Posting Trans Type	Trans type to be used by Treasury rec. when confirming a summary-level manual schedule	01
Summary Posting Fund	Code to be used by Treasury Rec. when confirming a summary-level manual schedule	2002 206X
Reason Codes (section)		
Interest Reason Code (Docs)	Default code to be used on a late payment if an interest reason code is not specified	02
Interest Reason Code (AD)	Default code to be used on the payment selection job if none were required on the PA	02
Invoice Interest Reason Code	Interest reason code on the invoice	02
Receipt Interest Reason Code	Interest reason code on the receipt	01
Discount Lost Reason Code (Docs)	Default reason used when user does not enter code on the PA	02
Discount Lost Reason Code (AD)	Default reason used by disbursing process if code was not used when PA processed	02
Discount Lost Reason Code (NE)	Default reason used when disbursing process determines a discount is not economically justifiable	01

B.8 Prompt Pay Types

The Prompt Pay Types, established on the Prompt Pay Type Maintenance table [*Figure B-8: Prompt Pay Type Maintenance Table*] (a General Systems reference table), specifies the number of payment days, the interest rates, and whether the payment dates should be calculated based on the invoice log date, the acceptance date, or the later of the two. Unless otherwise specified on the PA (via the entered invoice), the Prompt Pay Type will first be defaulted from the referenced purchase order. If no value is specified, the Prompt Pay Type will be defaulted from the vendor address. If no value is specified on the vendor address, then the Prompt Pay Type will be defaulted from the Payment Options table. Since a vendor may be subject to several Prompt Pay Types, GSA will not typically provide a default Prompt Pay Type on the vendor address. All Prompt Pay Types are shown in *Figure B-9: All Prompt Pay Types in Prompt Pay Maintenance Tabs*.

Field	Description	Value
General (section)		
Code	System identifier for the prompt pay type	STD
Name	Name of the prompt pay type	Standard
Short name	Abbreviated name of the prompt pay type (for reporting)	
Status (drop-down box)	Indicates whether it is a valid prompt pay type to use in the system	Active
Security Org	Restricts the use of the discount lost reason to the users that belong to the selected Security Organization	PEGASYS
Trigger Date	Used for payments subject to the standard prompt pay type where schedule date is based on the latter of the invoice log date versus the acceptance date.	Standard
Penalty Rate (%)	Annual fee to be applied to any payment qualifying for a penalty payment.	0

Field	Description	Value
Penalty Amount	Dollar amount of a flat rate fee for a penalty	\$0.00
Interest Days	Incremental number of days from payment lag after which interest and penalties will begin to accrue on a payment	0
Payment Lag Days	Number of days that a payment should be held before being disbursed	30
Effective Dates (group box)		
Start Date	The first date that this code is valid.	
End Date	The last date that this code is valid.	
Interest Rates (section)		
Date 1	Date that an interest rate will be effective	07/01/2008
Rate 1 (%)	Annual effective interest rate	5.125
Date 2	Date that an interest rate will be effective	01/01/2009
Rate 2 (%)	Annual effective interest rate	5.6250
Date 3	Date that an interest rate will be effective	07/01/2009
Rate 3 (%)	Annual effective interest rate	4.8750
Date 4	Date that an interest rate will be effective	01/01/2010
Rate 4 (%)	Annual effective interest rate	3.2500
Date 5	Date that an interest rate will be effective	07/01/2010
Rate 5 (%)	Annual effective interest rate	3.1250
Description (section)		
Description	A free text field used to enter additional information about the discount lost reason.

B.9 Schedule Number Template Maintenance

In the Schedule Number Template Maintenance window *Figure B-10: Schedule Number Maintenance Table*, the FY, Schedule Type, Payment Category and Schedule Category values are entered. The user then enters the format string, prefix, and starting and ending number. The Schedule numbers are then automatically created using those parameters. The schedule number templates are shown in *Figure B-11: Schedule Number Templates*.

Use format – GS+Fisc Year+Sched. Type+Seq #

Figure B-10: Schedule Number Maintenance Table

The screenshot shows a web-based form titled "Schedule Number Template". At the top, there are dropdown menus for "Fiscal Year" (set to 2003), "Schedule Type" (set to Corporate), "Payment Category" (set to VENDOR), and "Schedule Category" (set to Treasury Disbursed Check). Below these are checkboxes for "FRB Disbursing" and "FRB Receiving". A large input field labeled "Prefix:" contains a single character. Under "Format String:", the value "GS04C#***" is entered. The "Starting Number" is set to 1000 and the "Ending Number" is set to 9999. At the bottom left, a link "Go to top of page" is visible.

Figure B-11: Schedule Number Templates

Field	Description	Value	Value	Value	Value	Value	Value	Value	Value
Fiscal Year	The fiscal year associated with the schedule number.	Current	Current	Current	Current	Current	Current	Current	Current
Schedule Type	Indicates the type of schedule associated with the given schedule number; valid values are Corporate or Personal.	Corporate	Personal	Corporate	Personal	Corporate	Personal	Corporate	Personal
Payment Category	Indicates whether payments will be subject to Treasury Offsets	VENDOR	VENDOR	VENDOR	VENDOR	MISC	MISC	MISC	MISC
Schedule Category	The payment category associated with the given schedule number; valid values are Treasury Disbursed Check, ACH (CCD+/PPD+), ACH (CTX), or TFCS.	Treasury Disbursed Check	Treasury Disbursed Check	ACH (CCD+/PPD+)	ACH (CCD+/PPD+)	Treasury Disbursed Check	Treasury Disbursed Check	ACH (CCD+/PPD+)	ACH (CCD+/PPD+)
FRB Disbursing (check box)	Indicates if schedule is disbursed through the Federal Reserve Bank.	False	False	False	False	False	False	False	False
Schedule Number (group box)									
Prefix	The prefix associated with the Format string.								

Field	Description	Value							
Format String	The number to be assigned to a schedule.	GSYYC### #	GSYYP### #	GSYYV### #	GSYYT### #	GSYYD### #	GSYYQ### #	GSYYX### #	GSYYY### #
Starting Number	The starting number for the schedule template.	1000	1000	1000	1000	1000	1000	1000	1000
Ending Number	The ending number for the schedule template.	9999	9999	9999	9999	9999	9999	9999	9999

C Appendix C: Common Batch Return Codes

C.1 Common Return Codes List

Note: List Derived During Regression Testing of Automated Disbursements.

Job Type	Error Category	Return Code	Warning/Error Message	Message Description	General Resolution Steps	POC
Payment Selection	Pegasys Data Error	8	BJ0521E: The agency location code could not be inferred by the fund or the disbursing office.	The Disbursing Office is not set-up properly for the ALC code.	Identify the disbursing office used on the payment document and verify the ALC set up on the Disbursing Office Maintenance table.	Data Reference Analyst
Payment Selection	Pegasys Data Error	4	BJ0517W: The payment for [doc #] will not be made because the vendor [vendor #] is currently holding payments.	The vendor address code being used on the payment has been marked so that all payments are held. Vendor's payments are held when there is a dispute with the vendor and no payments should be sent.	Correct the vendor's record and un-check the Hold Payments flag.	Data Reference Analyst/ Finance Centers
Payment Selection	Pegasys Data Error	8	BJ0531E: No interest accounting distribution found for fund [fiscal year] [fund].	The interest accounting distribution was not set-up properly.	Research the set-up existing for the identified fund and payment document. Verify that an interest distribution for that BFY/Fund was set up on the Interest, Penalties and Discount Distribution table.	Data Reference Analyst
Payment Selection	Pegasys Data Error	8	BJ0529E: The payment [doc#] was skipped due to errors.		Review the payment document listed on the Undisbursed Payments Query.	Finance Centers
Payment Selection	Pegasys Data Error & Batch Error	8	BJ0510E: [Disbursing Office name] is not a valid Disbursing Office.	The disbursing office parameter value is not valid on the Disbursing Office Maintenance table.	Verify that the disbursing office is valid on the Disbursing Office table.	Program Analyst & Finance Centers
Payment Selection	Pegasys Data Error & Batch Error	4	BJ0525W: There are no undisbursed payments or replacement payments to be disbursed. Please	There are no payments on the Undisbursed Payments Query that match the entered parameters	Verify the batch job parameter setting and review the payments to be selected on the Undisbursed	Program Analyst & Finance Centers

Job Type	Error Category	Return Code	Warning/Error Message	Message Description	General Resolution Steps	POC
			verify the selection criteria and re-run if necessary.	for the job.	Payments Query.	
Payment Selection	Pegasys Data Error	8	BJ0532E: The total payment amount [amount] for payment [doc#] exceeds the payment amount limit [amount] for [payment type] payments.	The selected payment has exceeded the maximum payment amount allowed by Treasury, as defined on the Payment Options table. This may happen due to interest amounts calculated during Payment Selection that bump the total payment amount over the defined limit.	Review the payment document and modify it to avoid exceeding the limit.	Finance Centers
Payment Selection	Pegasys Data Error	4	BJ0519W: Cannot Infer SSN or TIN for payment [doc#].	The vendor used on the payment document does not have a SSN/EIN entered on the vendor record.	Check set-up of the vendor used on payment in the Vendor Maintenance table. Note: Error is only a warning/informational and that the payment will still disburse even if no action is taken.	Finance Centers
Payment Processor	Batch Error	8	BJ0484E: No undisbursed payments for disbursement runNumber [runNumber].	The run number parameter entered does not have any corresponding payments. This message will appropriately be received if there were no payments to be disbursed that particular day.	Verify that Payment Selection completed and the script correctly populated runNumber for the job's parameter. If Payment Selection completed with a 4 and the message BJ0525W (see above) was received, then this message should be received (no resolution necessary).	Program Analyst
Payment Processor	Pegasys Data Error & Batch Error	12	BJ0498S: There are no more schedules for the following criteria:	The Schedule Numbers Maintenance table ran out of schedule numbers for the particular schedule category/type.	Add new numbers to the Schedule Number Maintenance table.	Data Reference Analyst/ Program Analyst

Job Type	Error Category	Return Code	Warning/Error Message	Message Description	General Resolution Steps	POC
Payment Processor	Pegasys Data Error	8	BJ0491E: There are [number] Treasury check payments. The minimum specified in payment options is [min.#]. All Treasury check payment will be placed back onto the Undisbursed Payments Query.	The number of payments on a particular schedule is under the minimum number as defined on the Payment Options Maintenance table.	If the minimum number cannot be decreased, the jobs cannot run until more payments exist in the system to be disbursed.	Finance Centers
Schedule Posting	Pegasys Data Error	8	BJ0706E: The undisbursed payment will be marked for rescheduling.	The payment will not be on a schedule.	Review returned payments on Undisbursed payments query.	Finance Centers
Schedule Posting	Pegasys Data Error	8	Payment Authorization\ Pa\ Accounting Line 1: AD0133E: No transaction definition exists for fiscal year [year], document type [doc type], transaction type [trans type code] and process activity [In Transit].	Schedule Posting requires that Transaction Definition codes are set up for each PA document type that points to the ' In Transit' process activity. This transaction type code does not exist on the table.	Review Transaction Definition Maintenance table. An entry must be added for the payment document type that points to the 'In Transit' process activity.	Data Reference Analyst
Schedule Posting	Pegasys Data Error	8	BJ0699E: Problems were encountered with schedule [schedule number]. BJ0700E: All payments on the schedule will be placed back onto the Undisbursed Payments Query.	The schedule will not be created and all payments will be returned to the Undisbursed Payments query. Those payment documents that contained errors will be marked unapproved for disbursement.	Review returned payments on Undisbursed payments query. Once proper transaction types exist, payments must be approved for disbursement (see Automated Disbursements User's Guide). All payment documents that did not have a transaction type problem will be automatically approved and can be re-run immediately.	Data Reference Analyst/ Finance Centers

Job Type	Error Category	Return Code	Warning/Error Message	Message Description	General Resolution Steps	POC
Schedule Posting	Pegasys Data Error	8	Payment Authorization\ Pa\ Accounting Line 1: AD0008E: No interest accounting distribution found for fund [fiscal year] [fund].	The interest accounting distribution was not set up properly.	Research the set-up existing for the identified fund and payment document. Verify that an interest distribution for that BFY/Fund was set up on the Interest, Penalties and Discount Distribution table.	Data Reference Analyst
Schedule Posting	Pegasys Data Error	12	BJ0776S: The schedule is missing for fiscal year [year] schedule category [category] schedule type [type] schedule number [number].		Add numbers to the Schedule Number table.	Data Reference Analyst
Treasury Reconciliation	Pegasys Data Error	8	Schedule/Schedule Detail: AD0134E: Cannot backout a schedule that contains a canceled check/payment.	A user may not request backout of a confirmed schedule if a check cancellation document has been recorded in Pegasys for a particular payment on that schedule.	Review the schedule on the Schedule Query. The Check Cancellation document may need to be cancelled in order to successfully back out the schedule.	Finance Centers
Treasury Reconciliation	Pegasys Data Error	8	BJ0633E: The following schedule was not posted...		Review the schedules on the Schedule Query.	Finance Centers
Treasury Reconciliation	Pegasys Data Error	8	Payment Authorization\ Pa\ Accounting Line 1: AD0133E: No transaction definition exists for fiscal year [year], document type [doc type], transaction type [trans type code] and process activity Post Confirm Details.	Treasury Reconciliation requires that Transaction Definition codes are set up for each PA document type that points to the 'Post Confirm Details' process activity. This transaction type code does not exist on the table.	Review Transaction Definition Maintenance table. An entry must be added for the payment document type that points to the 'Post Confirm Details' process activity.	Data Reference Analyst

Job Type	Error Category	Return Code	Warning/Error Message	Message Description	General Resolution Steps	POC
Cancellation n Reconciliation on	Pegasys Data Error	8	Payment Authorization\ Pa\ Accounting Line 1: AD0133E: No transaction definition exists for fiscal year [year], document type [doc type], transaction type [trans type code] and process activity Cancellation Reconciliation.	Cancellation Reconciliation requires that Transaction Definition codes are set up for each PA document type that points to the 'Cancellation Reconciliation' process activity. This transaction type code does not exist on the table.	Review Transaction Definition Maintenance table. An entry must be added for the payment document type that points to the 'Cancellation Reconciliation' process activity.	Data Reference Analyst

D 7.1.2 Upgrade Enhancements

D.1 Early Issue Identification

The Automated Disbursement Early Issue Identification lessens errors which occur during the Automated Disbursement batch processes.

This enhancement implements overrideable edits which will be invoked during the verification and submission of a transaction. The edits introduced will be those which normally cause issues during the disbursement batch processes. Implementing edits at the point of transaction entry will lessen the chance of errors or dropped disbursement schedules during execution of the disbursement batch processes by identifying issues prior to running the disbursements cycle. The following edits will be introduced as part of this enhancement:

1. When verifying a Check/Electronic Funds Transfer (EFT) payable, ensure there is a "Disbursement In Transit" Accounting Event established on the Transaction Definition maintenance table whenever the disbursing method is set to Federal Reserve Board (FRB), Treasury, or State Disbursing. To properly enforce this edit, it will be required that Pegasys check the referenced transaction definition on the transaction against the entries existing on the Transaction Definition maintenance table. Since the entries on the Transaction Definition maintenance table are entered by fiscal year, it will be required to determine the fiscal year used at the time of disbursement. The system will then validate that a "Disbursement In Transit" accounting even has been established for the fiscal year and transaction definition entered on the payable.

Pegasys will use the Schedule Date of the transaction to determine the fiscal year. The transaction definition referenced on the document in combination with the fiscal year will be checked against the transaction definition maintenance table. If no "Disbursement In Transit" accounting event has been established for the fiscal year and referenced transaction definition of the potential disbursement, the system will display the error code. If flexible postings are enabled, the system will check to see if a "Disbursement In Transit" flexible definition exists.

2. When verifying a Check/EFT payable determine if an entry exists on the Interest , Penalty, and Discount Distribution table (shown in [Figure D-1] below) for the fund referenced on the transaction if the line is eligible for Prompt Pay. This edit will help eliminate potential errors related to interest, penalty, and/or discounts due to missing entries on the Interest, Penalty, and Discount Distribution table. Although not all disbursements eligible for prompt pay will generate interest or penalties, provoking this edit for any payment lines which could possibly generate interest, penalties, or use discounts will greatly reduce the number of errors caused by this issue during Payment Processor.

Pegasys will use the current logic to determine if a payment line is subject to prompt pay. If the payment line is eligible for prompt pay, the system will then check whether entries are necessary for Interest, Penalties, Discounts, or any combination of the three. If any discount terms have been entered on the transaction line, it will be necessary to have an entered Discount Distribution Type. For determining the need for Interest or Penalties, it will be necessary to check the entered Prompt Pay Type against the Prompt Pay Type Maintenance Table. If a Penalty Rate % or Penalty Amount has been entered for the referenced Prompt Pay

Type, a Penalty Distribution Type is needed. If any Interest Rates have been entered it is necessary to have an Interest Distribution Type.

After determining which of the three distribution types are needed for the transaction, Pegasys will then use the combination of Partition, Beginning Budget Fiscal Year (BBFY), Ending Budget Fiscal Year (EBFY), Fund Code, and needed Distribution Type and look to see if an entry exists for that combination on the Interest, Penalty, and Discount Distribution table. If it does not contain an entry, an error will be displayed.

3. When verifying Check/EFT payables, ensure that a Schedule Number Template has been established for the anticipated Schedule Number used for the payment during the fiscal year of the disbursement. If a Schedule Number Template does not exist, the disbursing cycle will terminate during Payment Processor since it would be unable to assign schedules. Since the Schedule Number Template maintenance table (shown in [Figure D-2] below) is also based on fiscal years, it will be required to determine the anticipated fiscal year of the disbursement. In addition, it will also be required to use information entered on the Disbursing Information tab on the transaction to properly identify the necessary template needed for the transaction.

The system will use the entered or anticipated Schedule Date of the transaction in order to determine the fiscal year. It will then use the entered Schedule Type, Payment Category, Schedule Category, and inferred Agency Location Code (ALC) on the transaction to determine which template would be needed. The ALC can either be inferred from the entered fund dimensions or derived from the entered disbursing office. The ALC is an optional entry on the Schedule Number Template maintenance table, so it is not necessary for it to be verified upon initial look-up of the schedule number template. If the combination of information entered on the transaction cannot locate a corresponding entry on the Schedule Number Template maintenance table, an error will be displayed.

4. Existing edits which are enforced on the Imprest Fund (IF), Itemized Payment (IP), Travel Advance (TN), Third Party Payment Voucher (TP), and Travel Voucher (TV) Document Categories will now be applied to the Itemized Match Invoice (II) Document Category as well. The edits introduced to the II Document Category as part of this item are all existing edits currently applied to other Document Categories; they will now just be applicable to the II Document Category.

Figure D-1: Interest, Penalty, and Discount Distributions Maintenance Table

Search - Interest, Penalty, and Discount Distributions				
Search Criteria				
BBFY:	2014			
EBFY:				
Fund:	925			
Partition:				
Distribution Type:

Partition	BBFY	EBFY	Fund	Distribution Type
30	2014	2015	925	Discount
30	2014	2015	925	Interest
30	2014	2015	925	Penalty

Figure D-2: Schedule Number Template Maintenance Table

The screenshot shows a search interface for 'Schedule Number Template'. The search criteria include: Year (2014), Format String, Starting Number, Ending Number, Schedule Type (Corporate, Treasury Disbursed Check), Schedule Category (ACH [CCD+IPPD]), and Period Ending (01/2014). Below the search bar are buttons for Save, Open, Delete, Display, All, Items, View as CSV, and Exit. The main area displays a grid of schedule entries:

Year	Format String	Starting Number	Ending Number
2014		0014*****	9999
2014		0014*****	9999
2014		0014*****	9999
2014		0014*****	9999
2014		0014*****	9999
2014		0014*****	9999
2014		0014*****	9999
2014		0014*****	9999

D.2 Schedule Posting Parameter for Rescheduled Payment Behavior

The Schedule Posting Parameter for Rescheduled Payment Behavior enhancement will add a new parameter (`errorsRemainApproved`) to the Schedule Posting process (NADSCHPOST) to allow users to configure whether payments that have posting errors are returned to the Undisbursed Payment query as Approved or Unapproved shown in [Exhibit D-3] below. The Rescheduled flag will continue to be set on transactions which the Schedule Posting process returns to the Undisbursed Payment query. The option to indicate that the payments be returned as Approved. Returning the payments as Unapproved could be preferred so that a subsequent execution of the disbursement cycle will not select the potential “problem” payments. Users will be able to review them first before the payment moves on to the next step. However, this will add another step for relevant users to review the payment again, especially if it is part of a zero payment. On the other hand, returning the payments as Approved could be preferred so that relevant users do not have to review the payment again, thus reducing the number of steps.

Figure D-3: Added “Errors Remain Approved” Parameter to NADSCHPOST

The screenshot shows the 'Batch Job Maintenance: Simple Parameters' screen under the 'Momentum > Utilities > Batch Execution > Batch Jobs > Batch Job Maintenance: ADTRESP0ST > Simple Parameters' menu. The 'Simple Parameters' tab is selected. The table shows the following parameters:

Sequence Number	Name	Required	Value
1	effectiveDate	False	
1	errorsRemainApproved	False	F
1	overriddenFlag	False	
1	runNumber	False	006507
1	userId	True	admin

Below the table, the parameter details for 'errorsRemainApproved' are shown:

- Sequence Number: 1
- Name: errorsRemainApproved
- Required:
- Multiple Values Allowed:
- Data Type: STRING
- Default Value: F
- Value: F

At the bottom right, it says 'Rank 1 : TestCodeWord : Rank 1'.

D.3 Support PAM File Format Version 5.0.0

Treasury's Payment Automation Manager (PAM) system is ultimately replacing what has been commonly referred to as the Treasury Bulk file formats, so agencies that are currently creating disbursing files via Bulk will be transitioning over to using the PAM format.

This will enable Pegasys to create Treasury Disbursement files that follow the Payment Automation Modernization (PAM) Input File Specifications for the Standard Payment Request (SPR). GSA currently submits disbursement files to Treasury using the Treasury Bulk File format. Treasury is modernizing payment operations through the PAM project, which will consolidate more than 30 legacy applications into a single application that will process agency payment requests in a more efficient and cost effective manner. The PAM file format will also enable agencies to provide the Treasury Account Symbol (TSYM) and Business Event Type Code (BETC) that is required for agencies to become Central Accounting and Reporting System (CARS) reporters.

The PAM output file has a different format than the Bulk file that is currently used by GSA. It contains most of the same fields that have already been stored on payment transactions but slightly modified, as described below. The new PAM output file format offers a means of reporting TSYM-BETC information for ALCs as they become GWA reporters. The changes related to the new PAM output file have an impact on the way the disbursement files are generated, which specifically impacts the Payment Selection, Payment Processor, and Payment Generation batch processes.

The affected disbursement batch jobs include Payment Selection (NADPMTSEL), Payment Processor (NADPYPPROC), and Payment Generation (NADPYGEN).

D.4 Miscellaneous Accounts Payable and Automated Disbursements Improvements

1. An edit will be placed into Pegasys to verify that when referencing an invoice by invoice number, the Log Date for that invoice must match on all transactions lines which reference that invoice. This edit will be validated against any reference of the same invoice within a document as well as other documents which have already referenced the same invoice. The edit will be performed during new form creation, corrections to existing lines which already reference an invoice, and any correction to an existing line in which an invoice is being added or modified. Verifying the Log Dates match will lessen the chance of manual error when referencing invoices, ensure interest and penalties are calculated accurately, and that disbursements are scheduled accordingly. This validation will not be completed on invoice document references, only on references entered by an invoice number only.
2. Add a confirmation message which will be displayed to the user prior to completing a schedule rejection (shown in [Figure D-4] below). Since a schedule rejection cannot be backed out, this message will lessen the chance that a schedule is inadvertently rejected.

Figure D-4: Schedule Query – Schedule Rejection Confirmation

3. Add more fields to the Summary tab of Accounts Payable transactions. Adding additional fields allows users more flexibility to edit amounts on the Summary tab of a transaction and rids the need to edit amounts on individual accounting or itemized lines. Among the field additions to the Summary Page will be Applied Credit, Applied Prepayment Amount, Holdback Amount, and Suspension Amount. These fields will also be added to their Header Accounting Lines and Itemized Accounting Lines tabs for consistency (shown in [Figure D-5] and [Figure D-6] below).

Figure D-5: Itemized Payment – Header Accounting Line

Line Amounts		
	Current Amount	Applied Prepayment Amount:
Payment	\$1.00	\$0.00
Applied Credit	\$0.00	\$0.00
Taxes	\$0.00	
Withholding Tax	\$0.00	
Line Amount After Withholding	\$1.00	
Withholding Tax Allowance	\$0.00	
Net Total	\$1.00	

Figure D-6: Itemized Payment – Itemized Accounting Line

Line Amounts		
	Current Amount	Applied Prepayment Amount:
Payment	\$100.00	\$0.00
Applied Credit	\$0.00	\$0.00
Withholding Tax	\$0.00	
Line Amount After Withholding	\$100.00	
Withholding Tax Allowance	\$0.00	
Net Total	\$100.00	

4. A new Automated Disbursement report will be created. This report will provide the opportunity to identify transactions on the Undisbursed Payment Query (UPQ), which potentially could cause Interest or Penalty issues during the disbursement batch processes. Identifying transactions prior to executing the batch lessens the chance of dropped schedules or the need to run Payment Preprocessor to back out vouchers stuck in disbursement.

The Log Date edit will lessen the chance of manual errors when users are referencing invoices, will help ensure interest and penalties are calculated properly, and will aid with the scheduling of disbursements.

Users will be able to edit and view additional commonly used fields on the Summary tab of payment transactions, providing a more streamlined view and editing opportunity at key information.
